Cmmi Assessments Motivating Positive Change:

CMMI Assessments Marilyn Bush, Donna Kastle Dunaway, 2005 Assessments remain at the cutting edge of process improvement but very few practitioners what they are designed to do and how they work **Process Improvement with CMMI v1.2 and ISO Standards** Boris Mutafelija, Harvey Stromberg, 2008-10-30 In this age of globalization process improvement practitioners must be able to comprehend and work with the different standards and frameworks used around the world While many systems and software engineering organizations rely on a single standard as the primary driver of process improvement efforts CMMI based process improvement in the U S an **Software Process Improvement and Capability Determination** Paul M. Clarke, Rory V. O'Connor, Terry Rout, Alec Dorling, 2016-05-11 This book constitutes the refereed proceedings of the 16th International Conference on Software Process Improvement and Capability Determination SPICE 2016 held in Dublin Ireland in June 2016 The 28 full papers presented together with 5 short papers were carefully reviewed and selected from 52 submissions The papers are organized in the following topical sections SPI in regulated and safety critical domains gamification and education issues in SPI SPI in agile and small settings SPI and assessment SPI and project management concerns empirical research case studies of SPI knowledge and human communications issues in SPI

Software Process Improvement and Capability Determination Terry Rout, Rory V. O'Connor, Alec Dorling, 2015-06-02 This book constitutes the refereed proceedings of the 15th International Conference on Software Process Improvement and Capability Determination SPICE 2015 held in Gothenburg Sweden in June 2015 The 17 revised full papers presented together with three short papers were carefully reviewed and selected from 48 submissions The papers are organized in topical sections on industrial frameworks implementation and assessment process improvement agile processes assessment and maturity models process and education TSP--leading a Development Team Watts S. Humphrey, 2006 Watts Humphrey inventor of CMM PSP TSP provides team leaders with a whole new way of leading an effective development team **SOA Maturity Model** Pericles Antoniadis, 2013-12-02 Companies have long sought to integrate existing Information Systems IS in order to support existing and potentially new business processes spread throughout their territories and possibly to collaborating organizations A variety of designs can be used to this end ranging from rigid point to point electronic data interchange EDI interactions to Web auctions By updating older technologies such as Internet enabling EDI based systems companies can make their IT systems available to internal or external customers but the resulting systems have not proven to be flexible enough to meet business demands A more flexible standardized architecture is required to better support the connection of various applications and the sharing of data Service Oriented Architecture SOA is one such architecture It unifies orchestrates business processes by structuring large applications as an ad hoc collection of smaller modules called Services These applications can be used by different groups of people both inside and outside the company and new applications built from a mix of services located in a global repository exhibit greater agility and uniformity Thus SOA is a

design framework for realizing rapid and low cost system development and improving total system quality SOA uses the Web Services standards and technologies and is rapidly becoming a standard approach for enterprise information systems integration SOA adoption by enterprises has been identified as one of the highest business priorities by a recent Gartner study Gartner 2007 and enterprises increasingly recognize the requirement for an increased Service orientation and relevant comprehensive frameworks which will not only help them position themselves and evaluate their SOA initiatives but also guide them in achieving higher levels of SOA maturity This in turn will help enterprises acquire and retain competitive advantage over other players in the market who are not using SOA and thus they are not so flexibly adjusting themselves to address new business requirements This book proposes a new SOA Maturity Model MM using a Delphi variant technique and this constitutes one of its distinguishing features because none of the relevant existing works utilized Delphi Moreover the fact that the proposed SOA MM supports inter enterprise setups makes it even more distinct The newly proposed SOA MM is then used to help the participating organizations position themselves in respect to SOA current status guide them to achieve higher levels of SOA maturity and anticipate their SOA maturity in five years time Furthermore the local or global nature of the proposed SOA MM is investigated This is checked firstly against selected expert panel participants and secondly against local business practitioners

Software Security Engineering Nancy R. Mead, Julia H. Allen, Sean Barnum, Robert J. Ellison, Gary R. McGraw, 2004-04-21 Software Security Engineering draws extensively on the systematic approach developed for the Build Security In BSI Web site Sponsored by the Department of Homeland Security Software Assurance Program the BSI site offers a host of tools guidelines rules principles and other resources to help project managers address security issues in every phase of the software development life cycle SDLC The book's expert authors themselves frequent contributors to the BSI site represent two well known resources in the security world the CERT Program at the Software Engineering Institute SEI and Cigital Inc a consulting firm specializing in software security This book will help you understand why Software security is about more than just eliminating vulnerabilities and conducting penetration tests Network security mechanisms and IT infrastructure security services do not sufficiently protect application software from security risks Software security initiatives should follow a risk management approach to identify priorities and to define what is good enough understanding that software security risks will change throughout the SDLC Project managers and software engineers need to learn to think like an attacker in order to address the range of functions that software should not do and how software can better resist tolerate and recover when under attack

Product-Focused Software Process Improvement Frank Bomarius, Markku Oivo, Päivi Järing, Pekka Abrahamsson, 2009-06-18 On behalf of the PROFES Organizing Committee we are proud to present the proceedings of the 10 International Conference on Product Focused Software Process Improvement PROFES 2009 held in Oulu Finland Since the first conference in 1999 the conference has established its place in the software engineering community as a respected conference that brings together participants from

academia and industry The roots of PROFES are in professional software process improvement motivated by product and service quality needs The conference addresses both the solutions found in practice as well as relevant research results from academia To ensure that PROFES retains its high quality and focus on the most relevant research issues the conference has actively maintained close collaboration with industry and subsequently widened its scope to the research areas of collaborative and agile software development A special focus for 2009 was placed on software business to bridge research and practice in the economics of software engineering This enabled us to cover software development in a more comprehensive manner and tackle one of the most important current challenges identified by the software industry and software research community namely the shift of focus from products to services The current global economic downturn emphasizes the need for new methods and solutions for fast and business oriented development of products and services in a globally distributed environment
