Current Topics in Clinical Radiobiology of Tumors Hans-Peter Beck-Bornholdt, 2012-12-06 The impact of basic science radiobiological research is now being recognized of significant importance in clinical radiation oncology Observations made in the laboratory using animals as well as tissue culture have led to a better biologic understanding of techniques for altered fractionation techniques for measuring tumor cell proliferation the possibilities and limitations of methods for evaluation of nonrandomized clinical studies in deriving time dose relationships for human tumors as well as a better understanding of repair kinetics in mammalian cells fractionation sensitivity and the major impact of technologies to improve local regional control with the subsequent impact on survival These findings have led to changes in treatment schedules and have led to further close cooperation among the radiation oncologists and radiation biologists Well support research efforts in radiation biology have a major and significant impact on the clinical care of the cancer patient Studies that originated in the laboratory are now finding their way into clinical practice resulting in better local and regional control and improved number of patients surviving without disease Evolution of Radiation Oncology at Massachusetts General Hospital Herman D. Suit, Jay S.

Loeffler, 2011-02-04 The Massachusetts General Hospital MGH has a history of excellence and is internationally recognized as a world class medical center providing quality medical care advancing medicine through clinical and laboratory research and facilitating the education of exceptional health care professionals The Massachusetts General Hospital Radiation Oncology Department staff residents and fellows past and present concur that MGH stands for Man's Greatest Hospital This decidedly immodest assessment is widely viewed amongst this group as being manifestly true and that perception is clearly reflected in a marvelous esprit de corps Such an unequivocally positive attitude is solidly based on the judgment that the best possible care is provided to each MGH patient i.e. the patient is in fact Number One There is a deep sense of pride in the contributions made by this department to the scientific advancement of oncology and to progressively and substantially increasing the proportion of patients who are free of tumor and of treatment related morbidity Evolution of Radiation of Oncology at Massachusetts General Hospital is the work of the former Chair of the Department Herman D Suit From 1970 2000 his guidance and management of this Department brought it to recognition as a world class center Dr Suit was key in the development and building of the Department that now includes The Northeast Proton Therapy Center at the MGH His

passion for the science of radiation therapy and its evolving growth through the years is evident in this book He has assembled a fascinating chronicle beginning with the creation of MGH in 1811 followed by personal experiences that culminated with his leadership of the Radiation Oncology Department
