J. Barker, 1997 When the South African Council for Automation and Computation SACAC first submitted a bid to host the 8th IFAC Symposium on Automation in Mining Mineral and Metal Processing in Beijing many obstacles were evident Most of these were embodied in negative international attitudes to the government of the Republic of South Africa and the apartheid society it supported However it is to the credit of the IFAC working group on automation in mining mineral and metal processing that their application at that time was considered favourably although not formally accepted It took a visit to the 10th IFAC World Congress in Sydney and a visible shift in the political scenario to persuade the relevant IFAC committees that South Africa would be suitable for the symposium A national organising committee was formed under the leadership of SACAC and the South African Institute of Measurement and Control SAIMC the South African Institute of Electrical Engineers SAIEE and the South African Institute for Mining and Metallurgy SAIMM The combined team set about organising the first major IFAC international symposium in South Africa since 1976 The theme for the Symposium was based on the need to promote technology transfer and papers which addressed this issue were favoured With over 50% of the authors from other countries a significant opportunity for technology transfer into South Africa was created which is in keeping with the overall theme *Dry Mineral Processing* Saeed Chehreh Chelgani, Ali Asimi Neisiani, 2022-02-28 This book introduces and explains all existing dry processing methods drawing from larges studies about these techniques in both the academia and industrial sectors Potentially water insufficiency is one of the critical issues that could be the major cause of international conflicts Thus reducing water consumption and pollution in all industrial sectors is an essential issue for all countries As a main part of the mining industry ore processing plants are highly dependent on water and water scarcity poses significant risk to the industry Thus water consumption is a strategic issue for mineral processing plants particularly in dry climate countries To select dry or wet processing the differences between these conditions should be taken into consideration which needs an in depth understanding of the various possible methods This

book will be of interest to professionals and researchers
