Correspondence Analysis In The Social Sciences:

Multiple Correspondence Analysis for the Social Sciences Johs. Hjellbrekke, 2018-06-18 Multiple correspondence analysis MCA is a statistical technique that first and foremost has become known through the work of the late Pierre Bourdieu 1930 2002 This book will introduce readers to the fundamental properties procedures and rules of interpretation of the most commonly used forms of correspondence analysis The book is written as a non technical introduction intended for the advanced undergraduate level and onwards MCA represents and models data sets as clouds of points in a multidimensional Euclidean space The interpretation of the data is based on these clouds of points In seven chapters this non technical book will provide the reader with a comprehensive introduction and the needed knowledge to do analyses on his her own CA MCA specific MCA the integration of MCA and variance analysis of MCA and ascending hierarchical cluster analysis and class specific MCA on subgroups Special attention will be given to the construction of social spaces to the construction of typologies and to group internal oppositions This is a book on data analysis for the social sciences rather than a book on statistics The main emphasis is on how to apply MCA to the analysis of practical research questions It does not require a solid understanding of statistics and or mathematics and provides the reader with the needed knowledge to do analyses on his her own

Correspondence Analysis in the Social Sciences Michael Greenacre, Jörg Blasius, 1994-09-21 The first part of the book deals with basic concepts of correspondence analysis and related methods for analyzing cross tabulations It then looks at the multivariate case when there are several variables of interest including the relationship to cluster analysis factor analysis and reliability of measurement Applications to longitudinal data event history data panel data and trend data are demonstrated

Multiple Correspondence Analysis Brigitte Le Roux, Henry Rouanet, 2009-12-16 Requiring no prior knowledge of correspondence analysis this text provides a nontechnical introduction to Multiple Correspondence Analysis MCA as a method in its own right The authors Brigitte LeRoux and Henry Rouanet present the material in a practical manner keeping the needs of researchers foremost in mind Key Features Readers learn how to construct geometric spaces from relevant data formulate questions of interest and link statistical interpretation to geometric representations They also learn how to perform structured data analysis and to draw inferential conclusions from MCA The text uses real examples to help explain concepts The authors stress the distinctive capacity of MCA to handle full scale research studies This supplementary text is appropriate for any graduate level intermediate or advanced statistics course across the social and behavioral sciences as well as for individual researchers

Multilevel Network Analysis for the Social Sciences Emmanuel Lazega, Tom A.B. Snijders, 2015-12-16 This volume provides new insights into the functioning of organizational managerial and market societies Multilevel analysis and social network analysis are described and the authors show how they can be combined in developing the theory methods and empirical applications of the social sciences This book maps out the development of multilevel reasoning and shows how it can explain behavior through two different ways of contextualizing it First by

identifying levels of influence on behavior and different aggregations of actors and behavior and complex interactions between context and behavior Second by identifying different levels as truly different systems of agency such levels of agency can be examined separately and jointly since the link between them is affiliation of members of one level to collective actors at the superior level It is by combining these approaches that this work offers new insights New case studies and datasets that explore new avenues of theorizing and new applications of methodology are presented This book will be useful as a reference work for all social scientists economists and historians who use network analyses and multilevel statistical analyses Philosophers interested in the philosophy of science or epistemology will also find this book valuable
