Cultivating Humanity A Classical Defense Of Reform In Liberal Education:

Cultivating Humanity Martha C. Nussbaum, 1997 How can higher education today create a community of critical thinkers and searchers for truth that transcends the boundaries of class gender and nation Philosopher and classicist Martha C Nussbaum takes up the challenge of conservative critics of academe to argue persuasively that sustained reform in the aim and content of liberal education is the most vital and invigorating force in higher education Cultivating humanity Martha Craven Nussbaum, 1998 Cultivating Humanity Martha C. Nussbaum, 1998-10-01 How can higher education today create a community of critical thinkers that transcends the boundaries of class gender and nation Martha Nussbaum philosopher and classicist argues that contemporary curricular reform is already producing such citizens of the world in its advocacy of diverse forms of cross cultural studies *The Liberal Arts Tradition* Bruce A. Kimball, 2010-05-13 Ranging from Plato in antiquity to Martha Nussbaum in the present era the authors of the seventy readings included in *The Liberal Arts Tradition* present significant and exemplary views addressing liberal arts education over the course of its history particularly in the United States Most of the documents are newly translated or no longer available in print Arranged chronologically each selection is accompanied by an informative introduction and extensive explanatory notes discussing its place within the liberal arts tradition Based upon the author's twenty five years of experience leading seminars concerning the history of liberal education this collection presents a uniquely comprehensive and salient set of documents while incorporating the neglected portrayal and discussion of women within the history of the liberal arts **Law as Civic Education** Ariel Liberman, 2025-06-27 If a civic education is the essential foundation for a functioning discursive democracy how should it be taught This book offers an innovative solution arguing that far from abandoning the often grand promise of civic education as a means of cultivating reasoning skills and democratic character we should embrace it and proposes a reimagined civic education based on teaching students in primary and secondary school law and legal reasoning Drawing on a range of theoretical disciplines law philosophy ethics sociology psychology and moral educational and child development theory this monograph justifies the benefits of law learning as a form of character and civic education and offers historical and comparative educational examples to show what is possible It demonstrates how legal teaching can be incorporated into a K 12 curriculum and argues that such training can be transformative guiding students to become citizens capable of meeting the demands of democracy citizens with stronger reasoning skills a motivation to self examine their values and beliefs and bring them into conversation with social values and an ability to effectively navigate political institutions and participate in public discourse This compelling and deeply original work will be of interest to scholars and educators in the fields of civic education character and virtue education legal studies and philosophy of education **Challenging Euro-America's Politics of Identity** Jorge Luis Andrade Fernandes, 2008-01-07 In this fascinating book Jorge Luis Andrade Fernandes critically examines the impact of colonialism and postcolonial migration on the politics and identity of Euro American

imperial powers It considers how outsiders are part of the construction of the native identity of the nation state and also how they challenge its essential coherence when they return to the centre in our increasingly globalized world Engaging in a theoretically motivated discussion of a range of sources film fiction political theory and state policy the volume traces the nomadic movement of bodies across national frontiers helping us to question any natural link between nation states and identities and between places and peoples This is not merely a theoretical problem as Fernandes relates it to the very current crisis of nativistic multicultural identity in the West He examines how politics takes shape in transnational social and cultural encounters and how this new politics is not just about containing aliens but also contains fruitful possibilities for different modes of being Challenging Euro America s Politics of Identity will be of interest to advanced students and scholars in politics geography postcolonial studies cultural studies African and African American studies comparative literature American studies and Ethnic studies

Educational Theory and Jewish Studies in Conversation Harvey Shapiro, 2013

Educational Theory and Jewish Studies in Conversation From Volozhin to Buczac by Harvey Shapiro PhD brings together two different fields of study modern Jewish studies and contemporary educational theory to provide new theoretical frameworks for their interaction Although Jewish studies and education programs at secular universities have joined denominational and transdenominational institutions of higher learning in adopting a dual or parallel course structure there has been little scholarly attention given to the basis for doing so Shapiro provides alternative theoretical frameworks for the relationship between Jewish studies and educational theory and discusses different ways of developing and articulating these relationships between disciplines Shapiro shows what is at stake when students and faculty think and communicate together across discourses in particular between the fields of education and Jewish studies Presenting an alternative to conventional notions of interdisciplinarity this book s import extends to virtually all relationships between the humanities and professional education when these different discourses illuminate and challenge one another

Democracy's Education Harry C. Boyte, 2021-04-30

Today Americans feel powerless in the face of problems on every front Such feelings are acute in higher education where educators are experiencing an avalanche of changes cost cutting new technologies and demands that higher education be narrowly geared to the needs of today s workplace College graduates face mounting debt and uncertain job prospects and worry about a coarsening of the mass culture and the erosion of authentic human relationships Higher education is increasingly seen and often portrays itself as a ticket to individual success a private good not a public one

Democracy s Education grows from the American Commonwealth Partnership a year long project to revitalize the democratic narrative of higher education that began with an invitation to Harry Boyte from the White House to put together a coalition aimed at strengthening higher education as a public good The project was launched at the beginning of 2012 to mark the 150th anniversary of the Morrill Act which created land grant colleges Beginning with an essay by Harry C Boyte *Reinventing Citizenship as Public Work* which challenges educators and their partners to claim their power to shape the

story of higher education and the civic careers of students the collection brings world famous scholars senior government officials and university presidents together with faculty students staff community organizers and intellectuals from across the United States and South Africa and Japan Contributors describe many constructive responses to change already taking place in different kinds of institutions and present cutting edge ideas like civic science civic studies citizen professionalism and citizen alumni Authors detail practical approaches to making change from new faculty and student roles to changes in curriculum and student life and strategies for everyday citizen empowerment Overall the work develops a democratic story of education urgently needed to address today s challenges from climate change to growing inequality
