**Education in Nigeria** Daniel A. Nomishan, 2014-12-26 This book Education in Nigeria Reflections and Global Perspectives provides a broad overview of education in Nigeria It recognizes the vital role education plays in the development of Nigeria and has attempted to air the concerns and call of the Nigerian public as well as

educators for reform in the educational system in Nigeria The book further recognizes that Nigerian education continues to be evolved first into a system of Western European education and then into a global system of education It attempts to examine the status of education in Nigeria and thereby seeks solutions by exploring Nigeria s and global historical perspectives current trends and future directions regarding students and learning teachers and teaching the school curriculum and administration of schools It is expected that the comprehensive nature of the text will be beneficial to individuals in teacher preparation programs as well as those who plan to work with children in pre kindergarten nursery through secondary settings The chapter content of the book focuses on the variation of thought as to the principal objectives of educators to help students in Nigeria develop habits skills and ideas and help them to think It adds to the importance of providing education to all especially at the time when Nigeria is frankly making an effort to affirm democracy For any nation to be truly democratic it must maintain an educated electorate Education prepares people to make informed decisions that affect the society All children in Nigeria should therefore receive an education to prepare them to become effective members of the world society This book seeks to examine and reflect on education in Nigeria and globally *Language Matters* Timothy Reagan,2009-04-01 This book addresses a timely and very important topic language in education Language apparently is a very tricky business On the one hand everyone uses language and virtually everyone has strong views about language In the educational domain this seems to be especially true Language is not merely an intrinsic component of the educational process as the medium of instruction in the classroom but also serves as the mediator of social reality for students and teachers alike It plays a central role in articulating and conveying not only social cultural and empirical ideas but ideological concepts as well It is also used to make judgments about the speaker not to mention its role in maintaining differential power relations And yet in spite of this the role of language is not sufficiently recognized in classroom practice much of the time Nor is language except in fairly narrow ways really an especially central part of the curriculum in spite of its incredible importance To be sure we do spend a great deal of time and money attempting to teach students to read and write that is to provide them with basic literacy skills and we provide nominal support for foreign language education programs We also provide limited support for children coming to school who do not speak English What we do not do though is to recognize the absolute centrality of language knowledge and language use for the educated person This book seeks to address these issues from the broad perspective of critical pedagogy *Culturally Responsive Pedagogy* Sheryl V. Taylor,Donna M. Sobel,2011 Views culturally responsive teaching as a contextual and situational process for both teachers and students the students including those who are from a diversity of languages cultures racial ethnic backgrounds religions economic resources interests abilities and life experiences [Jspr Vol 31-N4](#) Journal of School Public Relations,2011-03-16 The Journal of School Public Relations is a quarterly publication providing research analysis case studies and descriptions of best practices in six critical areas of school administration public relations school and community relations community

education communication conflict management resolution and human resources management Practitioners policymakers consultants and professors rely on the Journal for cutting edge ideas and current knowledge Articles are a blend of research and practice addressing contemporary issues ranging from passing bond referenda to building support for school programs to integrating modern information
