

CULTURAL COMPETENCE AND PSYCHOTHERAPY: APPLYING ANTHROPOLOGICALLY INFORMED CONCEPTIONS OF CULTURE

KIMBERLEY LAKES

California State University, San
Bernardino

STEVEN R. LÓPEZ AND

LINDA C. GARRO

University of California, Los Angeles

The authors apply two contemporary notions of culture to advance the conceptual basis of cultural competence in psychotherapy: Kleinman's (1995) definition of culture as what is at stake in local, social worlds, and Mattingly and Lavelor's (2001) concept of shared narratives between practitioners and patients. The authors examine these cultural constructs within a clinical case of an immigrant family caring for a young boy with an autism-spectrum disorder. Their analysis suggests that the socially based model of culture and the concept of shared narratives have the potential to broaden and enrich the definition of cultural competence beyond its current emphasis on the presumed cultural differences of specific racial and ethnic minority groups.

Mental health services have historically not been responsive to the mental health needs of racial and ethnic minority groups in the United States (U.S. Department of Health & Human Services, 2001). Minority group members with diagnosable disorders are less likely than majority group members to use mental health services (e.g., Barrio et al., 2003) and to receive quality mental health care (e.g., Meltz, Croghan, Hanna, & Robinson, 2000). As one effort to address these noted disparities, numerous clinical scholars and researchers have argued that mental health systems and practitioners need to integrate a cultural perspective in providing services to these communities (e.g., Hall, 2001). Generally speaking, initiatives aimed at increasing cultural competence take two basic forms. At the institutional level, hiring practitioners who are knowledgeable of the communities they serve and who speak the languages of those communities are examples of ways institutions can move in the direction of cultural competence (Betancourt, Green, Carrillo, Ananeh-Firempong, 2003; Guarnaccia, Vega, & Bonner, 2006). At the clinical level, clinicians are encouraged to integrate cultural matters in their assessments and interventions (e.g., cultural formulation, Lewis-Fernandez & Diaz, 2002).

Despite the acknowledged need for mental health care to incorporate a cultural perspective, there are significant empirical and conceptual limitations to the study of cultural competence. Currently, there is no evidence that clinicians who adhere to a given culturally competent approach provide better mental health care than those clinicians who do not adhere to such an approach. Perhaps the best evidence in support of cultural competence concerns ethnic and linguistic match. Sue and colleagues (1991) indicate that Mexican- and Asian-origin patients in a public mental health system who receive services from clinicians who are ethnically and linguistically

Martin J. La Roche, 2012-08-22 Written by a leading expert in the field of culturally competent psychotherapeutic practice, this book presents an integrated psychotherapeutic framework designed to help students and practitioners understand, investigate, and treat clients from diverse cultural backgrounds. La Roche introduces a logical theoretical model that takes into account the influence of sociopolitical, economic, and cultural processes within the psychotherapeutic process. Using a three-phased psychotherapeutic model with specific clinical recommendations and suggestions for each phase, the book explores complex clinical cases that illustrate in detail each phase. Unique in its approach to and definition of the concept of cultural diversity, *Cultural Psychotherapy* expands the traditional ethnicity/race model to a model that examines individuals and groups according to a broader set of variables. In other words, the key to enhancing our understanding of our clients is to take into account the rich and dynamic context in which their lives develop and evolve. **Diversity, Culture and**
