CASIO.

Getting Acquainted

Congratulations upon your selection of this CASIO watch. To get the most out of your purchase, be sure to read this manual carefully.

Keep the watch exposed to bright light

The electronic circuitry controlling the solar cell of the watch is stored by a small capacitor. Leaving or using the watch where it is not exposed to light causes the battery to run down.

- Always turn the watch so exposed to light as much as possible.
- When you are not wearing the watch on your wrist, position the face so it is pointed at a source of bright light.
- You should try to keep the watch outside of your alarm as much as possible. Charging is reduced significantly if the face is only partially covered.

- The watch continues to operate, even when it is not exposed to light. Leaving the watch in the dark can cause the battery to run down, which will result in some watch functions to be disabled. If the battery goes dead, you will have to re-configure watch settings after recharging. To ensure normal watch operation, be sure to keep it exposed to light as much as possible.

Battery charges in the light.

Battery discharges in the dark.

- Supported time calibration signals: Germany (Mannheim), England (Popham), United States (Fort Collins, Japan).

Current Time Setting

This watch adjusts its time setting automatically in accordance with a time calibration signal. You can also perform a manual procedure to set the time and date, when necessary.

- The first thing you should do after purchasing this watch is to specify your Home City (the city where you normally will use the watch). For more information, see "To specify your Home City".

- When using the watch outside the areas covered by the time signal transmissions, you will have to adjust the current manually as required. See "Timekeeping" for more information about manual time settings.
- The U.S. time calibration signal can be picked up by the watch while in North America. The term "North America" in this manual refers to the area that consists of Canada, the continental United States, and Mexico.

To specify your Home City

1. In the Timekeeping Mode, push down (C) the city code screen to show "TODAY".
2. Press (C) (year) and (C) (month) to select the city code you desire.
3. Time calibration signal reception is supported when any one of the city codes shown in the table below is selected as your Home City.

City Code	City Name	City Code	City Name	City Code	City Name
01	Amsterdam	11	London	21	New York
02	Berlin	12	Madrid	22	Los Angeles
03	Bombay	13	Moscow	23	San Francisco
04	Buenos Aires	14	Paris	24	Seattle
05	Calcutta	15	Rome	25	Shanghai

10	Delhi	20	Seoul	30	Vladivostok

3. Press (C) to exit the setting screen.

- The actual level at which some functions are disabled depends on the watch model.
- Frequent display illumination can run down the battery quickly and require charging the battery more often than the charging time required to recover from a single illumination operation.

Approximately 1 minute exposure to bright sunlight coming in through a window. Approximately 30 minutes exposure to indoor fluorescent lighting.

- Be sure to read "Power Supply" for important information you need to know when exposing the watch to bright light.

If the display of the watch is blank...

If the display of the watch is blank, it means that the watch's Power Saving Function has turned off the display to conserve power.

- See "Power Saving Function" for more information.

About This Manual

Module 3050 (A)

Module 3060 (B)

- The operational procedures for Modules 3050 (A), 3060 (B), and 3061 are identical. All of the illustrations in this manual show Module 3050 (A).
- Depending on the model or your watch, display text appears either as dark figures on a light background, or light figures on a dark background. All sample displays and illustrations are shown using dark figures on a light background.
- Button operations are indicated using the letters shown on the illustration.
- Each section of this manual provides you with the information you need to perform operations in each mode. Further details and technical information can be found in the "Reference" section.

Important!

- Initially, your watch should show the correct time as soon as you select your Home City code. If it does not, it should adjust automatically after the next auto receive operation on the mode of the night. You can also perform manual receive if you can set the time manually.
- The watch will receive the time calibration signal automatically from the appropriate transmitter (in the middle of the night) and update its settings accordingly. For information about the relationship between city codes and transmitters, see "Home City Codes and Transmitters".
- Under factory default settings, auto-receive is turned off for all of the following city codes: MDW (Chicago), MEX (Mexico City), GUS (Guatemala), and JMC (Jamaica). For details about turning on auto-receive for these city codes, see "To turn auto-receive on and off".
- You can disable time signal reception, if you want. See "To turn auto-receive on and off" for more information.
- See the page under "Exception Changes" for information about the reception range of the watch.
- If you are in an area that does not use Daylight Saving Time (year-round), turn off the DST setting.

Time Calibration Signal Reception

There are two categories you can use to receive the time calibration signal: auto-receive and manual receive.

- **Auto Receive**
When auto-receive is on, the watch receives the time calibration signal automatically up to six times a day. When any auto-receive is successful, the remaining auto-receive operations are not performed. For more information, see "About Auto Receive".
- **Manual Receive**
Manual receive lets you start a time calibration receive operation with the press of a button. For more information, see "To perform manual receive".

Important!

- When getting ready to receive the time calibration signal, position the watch as shown in the nearby illustration, even its LCD screen side facing towards a window. Make sure there are no metal objects nearby.

- Make sure the watch is facing the right way.
