1. (1) (1) (1) - A maze reading assessment is a task that requires lower level students understand and they read silently. The maze is different from traditional comprehension in that it is based completely on the text. After the first sentence, every seventh word in the passage is replaced with the correct word and one distractor. Students choose the word from among the three options that fits best with the rest of the passage.

2. (1) (1) (1) - Capable readers understand the extent of what they read and the meanings of the words as they are used in the text. Lower students with reading difficulties can comprehend what they read with enough to choose words based on common and semantic accuracy. A maze reading assessment can identify these students and measure changes in their reading behavior as the result of instruction or practice.

3. (1) (1) (1) - Students read one passage that has been modified in a specific way. The first sentence of the passage is left intact to provide a meaningful start to the reading. For the rest of the passage, every seventh word is replaced with parentheses in which are listed the correct word from the passage and two distractors arranged randomly. The student circles the word within the parentheses that makes sense with the rest of the passage.

Students of the classroom understand the meaning of the passage. One is a maze distractor that is the same part of speech as either the seventh word or the correct word. The other is a far distractor that is often a word that is a good fit for the text but not compatible with the words in the passage.

The length of the passage varies from around 100 to 400 words. The passage is chosen depending on the grade placement or reading
