COVID-19 and Risk Society across the MENA Region , 2022-09-22 The impact of the COVID 19 pandemic at the interlocking levels of politics economy and society have been different across regions states and societies In the case of the Middle East and North Africa which was already in the throes of intense tumult following the onset of the 2011 Arab Spring COVID s blows have on the one hand followed the trajectory of some global patterns while at the same time playing out in regionally specific ways Based on empirical country level analysis this volume brings together an international team of contributors seeking to untangle how COVID 19 unfolds across the MENA The analyses are framed through a contextual adaptation of Ulrich Beck s famous concept of risk society that pinpointed the negative consequences of modernity and its unbridled capitalism The book traces how this has come home in full force in the COVID 19 pandemic The editors Larbi Sadiki and Layla Saleh use the term Arab risk society They highlight short term and long term repercussions across the MENA These include socio economic inequality a revitalized state of authoritarianism challenged by relentless democratic struggles But the analyses are attuned to problem solving research The ethnographies of the pandemic included in this book investigate transformations and coping mechanisms within each country case study They provide an ethically informed research praxis that can respond to the manifold crises crashing down upon MENA polities and societies

The Poisoning of the American Mind Lawrence M. Eppard, Jacob L. Mackey, Lee Jussim, 2024-09-25 What would you have to believe in order to dress up as a shaman paint your face and storm the U S Capitol What could possibly lead somebody to claim that it upholds white supremacy to encourage hard work self reliance rational thinking punctuality and politeness Such behaviors would have been unimaginable only a few years ago And yet here we are witnessing millions of people across the political spectrum displaying these clear indications of an epistemically poisoned mind Both red America and blue America are retreating into their own information bubbles seceding

from a common reality Both consume far too much misinformation and disinformation developing worldviews that can sometimes be unintelligible to others This book explores these disturbing developments and what they mean for our society and implores us all to recover a shared sense of what is true *Religion in Liberal Democracy as a Form of Life* Christoph Baumgartner, 2024-12-03 Religion in Liberal Democracy as a Form of Life advances a theory to deal with the challenges connected to the liberal democratic ideal that all people are free to codetermine the future of their society and equally entitled to their religion and beliefs given the historical bias towards Christianity in politics and culture within many European societies Religious diversity and social and political participation are in fact fiercely contested issues Critical scholars from philosophy and cultural theory contest that liberal political theories of freedom of religion can adequately deal with issues connected to an increasingly diversified and secularized religious field in historically Christian societies Consequently they claim that politics based on such theories cannot deliver on the promise to ensure conditions that allow all members of society equal religious freedom and political participation By outlining historical developments and by closely examining case studies of recent controversies about religious diversity in Germany and the Netherlands this book identifies shortcomings of the currently predominant liberal account of freedom of religion or belief Based on this analysis the author proposes a more complex theory of liberal democracy as a form of life with religion and religious freedom as components of it This takes into account that informal norms social structures and predominant notions of belonging can function as powerful obstacles to freedom and equality even if formal legal and political institutions prohibit discrimination based on religion Construing liberal democracy as a form of life that is as a set of social practices attitudes and their institutional manifestations and material expressions shifts the focus of critical analysis from the law to informal structures and components This provides an understanding of the dynamics of culturalized religion in society which has often been missing in political philosophical theories The theory proposed in this book provides normative criteria for building liberal democracies that are tolerant with respect to religious differences and solidaric in terms of ensuring conditions that allow all members of society to codetermine as equals the future of society irrespective of their religion or beliefs This book will appeal to scholars of political theory social and political philosophy religious studies sociology and anthropology
