Chinas Evolving Industrial Policies And Economic Restructuring China Policy Series:

China's Evolving Industrial Policies and Economic Restructuring Zheng Yongnian, Sarah Y. Tong, 2014-07-11 In the past three decades China has successfully transformed itself from an extremely poor economy to the world's second largest economy. The country's phenomenal economic growth has been sustained primarily by its rapid and continuous industrialisation. Currently, industry accounts for nearly two-fifths of China's gross domestic product, and since 2009 China has been the world's largest exporter of manufactured products. This book explores the question of how far this industrial growth has been the product of government policies. It discusses how government policies and their priorities have developed and evolved, examines how industrial policies are linked to policies in other areas such as trade, technology, and regional development, and assesses how new policy initiatives are encouraging China's increasing success in new technology-intensive industries. It also demonstrates how China's industrial policies are linked to development of industrial clusters and regions.

Beyond Energy Jacopo Maria Pepe, 2017-11-22 Jacopo Maria Pepe examines the rapid development of non-energy transport infrastructure in the broader Eurasian space. By doing so, the author considers the ongoing structural transformation of the Eurasian continent against the backdrop of deepening commercial interconnectivity in Eurasia into broader areas of trade supported by the rapid development of rail connectivity. He frames this process in a long-wave historical analysis and considers in detail the geopolitical, geo-economic, and theoretical implications of deepening physical connectivity for the relationships among China, Russia, Central Asia, and the European Union. China's Governance Model Hongyi Lai, 2016-06-10 Many studies of government in China either simply describe the political institutions or else focus critically on the weaknesses of the system, such as corruption or the absence of Western-style democracy. Authors of these studies fail to appreciate the surprising ability of China's government to rapidly transform a once impoverished economy and to recover from numerous crises from 1978 to the present. This book, on the other hand, takes a more balanced, more positive view. This view is based on a study of changes in China's institutions for coping with critical crises in governance since 1978.

These changes include better management of leadership succession better crisis management improved social welfare the management of society through treating different social groups differently depending on their potential to rival the Party state and a variety of limited intra party and grassroots democracy This book applies to the Chinese model the term pragmatic authoritarianism It explains changes to and the likely future direction of China's governance model It compares current risks in China's governance with threats that terminated dynasties and the republic in China over the past four thousand years and concludes that the regime can be expected to survive a considerable period despite its existing flaws Few topics in Chinese politics are as significant as the nature state and prospects of the political regime While the topic had been unduly understudied for a long period of time a young generation of scholars has emerged on this subject Among others the book by Hongyi Lai stands out and provides a comprehensive and penetrating analysis on this topic I am confident that his book will make a significant contribution to the study of Chinese politics and may well define the debate on China's political development governance and model for years to come Yongnian Zheng Director East Asian Institute National University of Singapore

China's Transition from Communism - New Perspectives Guoguang Wu, Helen Lansdowne, 2015-11-06 As China moved from a planned to a market economy many people expected that China's political system would similarly move from authoritarianism to democracy It is now clear however that political liberalisation does not necessarily follow economic liberalisation This book explores this apparent contradiction presenting many new perspectives and new thinking on the subject It considers the path of transition in China historically makes comparisons with other countries and examines how political culture and the political outlook in China are developing at present A key feature of the book is the fact that most of the contributors are China born Western trained scholars who bring deep knowledge and well informed views to the study

China's Assertive Nuclear Posture Baohui Zhang, 2015-02-11 China's nuclear capability is crucial for the balance of power in East Asia and the world As this book reveals there have been important changes recently in China's nuclear posture the movement from a minimum deterrence posture toward a medium nuclear power posture the pursuit of space warfare and missile defence capabilities and most significantly the omission in the 2013 Defence White Paper of any reference to the principle of No First Use Employing the insights of structural realism this book argues that the imperatives of an anarchic international order have been the central drivers of China's nuclear assertiveness The book also assesses the likely impact of China's emerging nuclear posture on its neighbours and on the international strategic balance especially with the United States The book concludes by examining China's future nuclear directions in the context of its apparent shift toward a more offensive oriented international strategy

International Engagement in China's Human Rights Titus Chen, Dingding Chen, 2015-07-03 Since the Tiananmen Square incident in 1989 there has been increasing international pressure on China to improve its approach to human rights whilst at the same time the Chinese government has itself realised that it needs to improve its approach and has indeed done much to implement improvements This book explores systematically the

international engagement in human rights in China and assesses the impact of such foreign involvement It looks at particular areas including criminal justice labour and religious freedom considers the processes by which international pressure is brought to bear and the processes by which improvements are implemented in China and concludes that whilst China's human rights record has improved more than many people realise further improvements are still needed **Chinese Higher Education Reform and Social Justice** Bin Wu, W. John Morgan, 2015-06-26 In place of a distributive justice perspective which focuses simply on equal access to universities this book presents a broader understanding of the relationship between Chinese higher education and economic and social change The necessity for research on the place of universities in contemporary Chinese society may be seen from current debates about and policy towards issues of educational inequality at Chinese universities Many questions arise as a consequence What are the limitations of neo liberalism in higher education policy and what are the alternatives How has the Chinese government met the challenges of educational inequality and what lessons may be learned from its recent initiatives How may higher education enhance social justice in Chinese society given economic social and cultural inequality What may be learned from the experience of Macau Hong Kong and of Taiwan in terms of achieving social justice in Chinese universities These questions are considered by a group of leading scholars from both inside and outside China **Ecological Risks and Disasters - New Experiences in China and Europe** Li Peilin, Laurence Roulleau-Berger, 2015-11-19 Climate change and also other factors are capable of bringing about major disasters on a scale hitherto unimaginable Ecological and other risks besides having scientific and technological dimensions are also a subject of study for social scientists concerned with how disasters and potential disasters are noticed perceived guarded against managed once they have occurred and coped with after they have happened This book considers a range of ecological risks and disasters and how they are managed in both China and Europe It examines how far risks and disasters are perceived and managed in different ways in Europe and China explores how an increasing humanitarian approach to vulnerable people being taken up in Europe is also being adopted in China and assesses how far the management of disasters differs from wider government management of more ordinary aspects of everyday life The book argues that the same stresses and strains which are present in normal society are there also in enhanced form in disaster situations China-Taiwan Rapprochement Min-Hua Chiang, 2015-10-30 This book examines how since about 2008 the economy of Taiwan has become ever more deeply integrated into the economy of China It goes beyond a consideration of trade and investment flows and discusses also the large population flows the growing integration of the two financial systems and the nature of the deep economic integration at the industry and firm level It considers the impact of growing economic integration on society and politics assesses how China Taiwan economic integration is affecting the East Asian region more widely and explores the implications for international relations including the United States dominance in the region Overall the book presents a comprehensive analysis of all the issues
