Clinical Trials in Oncology Stephanie Green,Jacqueline Benedetti,2012-05-09 The new edition of the bestselling Clinical Trials in Oncology provides a concise nontechnical and now thoroughly up to date review of methods and issues related to clinical trials The authors emphasize the importance of proper study design analysis and data management and identify the pitfalls inherent in these processes This edition includes a new section covering innovations in Phase I designs and another on overcoming the challenges of array data As always the authors use clear lucid prose and a multitude of real world trials as examples to convey the principles of successful trials without the need for a strong statistics or mathematics background *Clinical Trials in Oncology, Third Edition* Stephanie Green,Jacqueline Benedetti,Angela Smith,John Crowley,2012-05-09 The third edition of the bestselling Clinical Trials in Oncology provides a concise nontechnical and thoroughly up to date review of methods and issues related to cancer clinical trials The authors emphasize the importance of proper study design analysis and data management and identify the pitfalls inherent in these processes In addition the book has been restructured to have separate chapters and expanded discussions on general clinical trials issues and issues specific to Phases I II and III New sections cover innovations in Phase I designs randomized Phase II designs and overcoming the challenges of array data Although this book focuses on cancer trials the same issues and concepts are important in any clinical setting As always the authors use clear lucid prose and a multitude of real world examples to convey the principles of successful trials without the need for a strong statistics or mathematics background Armed with Clinical Trials in Oncology Third Edition clinicians and statisticians can avoid the many hazards that can jeopardize the success of a trial *Clinical Trials in Oncology, Third Edition* Stephanie Green,Jacqueline Benedetti,Angela Smith,John Crowley,2012-05-09 The new edition of the bestselling Clinical Trials in Oncology provides a concise nontechnical and now thoroughly up to date review of methods and issues related to clinical trials The authors emphasize the importance of proper study design analysis and data management and identify the pitfalls inherent in these processes This edition includes a new section covering innovations in Phase I designs and another on overcoming the challenges of array data As always the authors use clear lucid prose and a multitude of real world trials as examples to convey the principles of successful trials without the need for a strong statistics or mathematics background *Bayesian Disease Mapping* Andrew B. Lawson,2018-05-20 Since the publication of the second edition many new Bayesian tools and methods have been developed for space time data analysis the predictive modeling of health outcomes and other spatial biostatistical areas Exploring these new developments Bayesian Disease Mapping Hierarchical Modeling in Spatial Epidemiology Third Edition provides an up to date cohesive account of the full range of Bayesian disease mapping methods and applications In addition to the new material the book also covers more conventional areas such as relative risk estimation clustering spatial survival analysis and longitudinal analysis After an introduction to Bayesian inference computation and model assessment the text focuses on important themes including

disease map reconstruction cluster detection regression and ecological analysis putative hazard modeling analysis of multiple scales and multiple diseases spatial survival and longitudinal studies spatiotemporal methods and map surveillance It shows how Bayesian disease mapping can yield significant insights into georeferenced health data The target audience for this text is public health specialists epidemiologists and biostatisticians who need to work with geo referenced health data

Statistical Methods in Psychiatry and Related Fields Ralitza Gueorguieva, 2017-11-20 Data collected in psychiatry and related fields are complex because outcomes are rarely directly observed there are multiple correlated repeated measures within individuals there is natural heterogeneity in treatment responses and in other characteristics in the populations Simple statistical methods do not work well with such data More advanced statistical methods capture the data complexity better but are difficult to apply appropriately and correctly by investigators who do not have advanced training in statistics This book presents at a non technical level several approaches for the analysis of correlated data mixed models for continuous and categorical outcomes nonparametric methods for repeated measures and growth mixture models for heterogeneous trajectories over time Separate chapters are devoted to techniques for multiple comparison correction analysis in the presence of missing data adjustment for covariates assessment of mediator and moderator effects study design and sample size considerations The focus is on the assumptions of each method applicability and interpretation rather than on technical details Features Provides an overview of intermediate to advanced statistical methods applied to psychiatry Takes a non technical approach with mathematical details kept to a minimum Includes lots of detailed examples from published studies in psychiatry and related fields Software programs data sets and output are available on a supplementary website The intended audience are applied researchers with minimal knowledge of statistics although the book could also benefit collaborating statisticians The book together with the online materials is a valuable resource aimed at promoting the use of appropriate statistical methods for the analysis of repeated measures data Ralitza Gueorguieva is a Senior Research Scientist at the Department of Biostatistics Yale School of Public Health She has more than 20 years experience in statistical methodology development and collaborations with psychiatrists and other researchers and is the author of over 130 peer reviewed publications

Modern Directional Statistics Christophe Ley, Thomas Verdebout, 2017-08-03 Modern Directional Statistics collects important advances in methodology and theory for directional statistics over the last two decades It provides a detailed overview and analysis of recent results that can help both researchers and practitioners Knowledge of multivariate statistics eases the reading but is not mandatory The field of directional statistics has received a lot of attention over the past two decades due to new demands from domains such as life sciences or machine learning to the availability of massive data sets requiring adapted statistical techniques and to technological advances This book covers important progresses in distribution theory high dimensional statistics kernel density estimation efficient inference on directional supports and computational and graphical methods Christophe Ley is professor of mathematical statistics at Ghent

University His research interests include semi parametrically efficient inference flexible modeling directional statistics and the study of asymptotic approximations via Stein's Method His achievements include the Marie Jeanne Laurent Duhamel prize of the Soci t  Fran aise de Statistique and an elected membership at the International Statistical Institute He is associate editor for the journals Computational Statistics Data Analysis and Econometrics and Statistics Thomas Verdebout is professor of mathematical statistics at Universit  libre de Bruxelles ULB His main research interests are semi parametric statistics high dimensional statistics directional statistics and rank based procedures He has won an annual prize of the Belgian Academy of Sciences and is an elected member of the International Statistical Institute He is associate editor for the journals Statistics and Probability Letters and Journal of Multivariate Analysis

Missing Data Analysis in Practice Trivellore Raghunathan, 2015-10-28 Missing Data Analysis in Practice provides practical methods for analyzing missing data along with the heuristic reasoning for understanding the theoretical underpinnings Drawing on his 25 years of experience researching teaching and consulting in quantitative areas the author presents both frequentist and Bayesian perspectives He describes ea

Time Series Modeling of Neuroscience Data Tohru Ozaki, 2012-01-26 Recent advances in brain science measurement technology have given researchers access to very large scale time series data such as EEG MEG data 20 to 100 dimensional and fMRI 140 000 dimensional data To analyze such massive data efficient computational and statistical methods are required Time Series Modeling of Neuroscience Data shows how to

Flexible Imputation of Missing Data, Second Edition Stef van Buuren, 2018-07-17 Missing data pose challenges to real life data analysis Simple ad hoc fixes like deletion or mean imputation only work under highly restrictive conditions which are often not met in practice Multiple imputation replaces each missing value by multiple plausible values The variability between these replacements reflects our ignorance of the true but missing value Each of the completed data set is then analyzed by standard methods and the results are pooled to obtain unbiased estimates with correct confidence intervals Multiple imputation is a general approach that also inspires novel solutions to old problems by reformulating the task at hand as a missing data problem This is the second edition of a popular book on multiple imputation focused on explaining the application of methods through detailed worked examples using the MICE package as developed by the author This new edition incorporates the recent developments in this fast moving field This class tested book avoids mathematical and technical details as much as possible formulas are accompanied by verbal statements that explain the formula in accessible terms The book sharpens the reader's intuition on how to think about missing data and provides all the tools needed to execute a well grounded quantitative analysis in the presence of missing data

Power Analysis of Trials with Multilevel Data Mirjam Moerbeek, Steven Teerenstra, 2015-07-01 Power Analysis of Trials with Multilevel Data is a valuable reference for anyone who wants to perform power calculations on trials with hierarchical data It provides a thorough overview of power analysis familiarizing you with terminology and notation outlining the key concepts of statistical power and power analysis and covering all common hierarchical designs
