Chinese Philosophy on Teaching and Learning Xu Di, Hunter McEwan, 2016-03-01 A translation and discussion of the central Confucian text on education Xueji On Learning and Teaching influential in China from the Han dynasty to the present day Written over two and a half millennia ago the Xueji On Teaching and Learning is one of the oldest and most comprehensive works on educational philosophy and teaching methods as well as a consideration of the appropriate roles of teachers and students The Xueji was included in the Liji On Ritual one of the Five Classics that became the heart of the educational system during China's imperial era and it contains the ritual protocols adopted by the Imperial Academy during the Han dynasty Chinese Philosophy on Teaching and Learning provides a new translation of the Xueji along with essays exploring this work from both Western and Chinese perspectives Contributors examine the roots of educational thought in classical Chinese philosophy outline similarities and differences with ideas rooted in classical Greek thought and explore what the Xueji can offer educators today As the world of education awakens to the vitality and importance of China's educational traditions no text could be of greater interest than the Xueji China's most ancient text on learning and teaching This translation with interpretation and discussion from noted philosophers and educators in China and America will be an invaluable resource for courses in educational foundations comparative education and the history of education Ruth Hayhoe University of Toronto

Confucian Perspectives on Learning and Self-Transformation Roland Reichenbach, Duck-Joo Kwak, 2020-05-18 This book bridges the regions of East Asia and the West by offering a detailed and critical inquiry of educational concepts of the East Asian tradition It provides educational thinkers and practitioners with alternative resources and perspectives for their educational thinking to enrich their educational languages and to promote the recognition of educational thoughts from different cultures and traditions across a global world The key notions of Confucian and Neo Confucian philosophy directly concern the ideals processes and challenges of learning education and self transformation which can be seen as the western equivalences of liberal education including the German concept of Bildung All the topics in the book are of fundamental interest across diverse cultures giving

a voice to a set of long lasting and yet differentiated cultural traditions of learning and education and thereby creating a common space for critical philosophical reflection of one's own educational tradition and practice The book is especially timely given that the vocabularies in educational discourse today have been dominantly West centred for a long time even while the whole world has become more and more diverse across races religions and cultures It offers a great opportunity to philosophers of education for their cross cultural understanding and self understanding of educational ideas and practices on both personal and institutional levels *The Confucian Concept of Learning* Duck-Joo Kwak, Morimichi Kato, Ruyu Hung, 2019-12-18 What does the Confucian heritage mean to modern East Asian education today Is it invalid and outdated or an irreplaceable cultural resource for an alternative approach to education And to what extent can we recover the humanistic elements of the Confucian tradition of education for use in world education Written from a comparative perspective this book attempts to collectively explore these pivotal questions in search of future directions in education In East Asian countries like China Japan Korea and Taiwan Confucianism as a philosophy of learning is still deeply embedded in the ways people think of and practice education in their everyday life even if their official language puts on the Western scientific mode It discusses how Confucian concepts including rote learning and conformity to authority can be differently understood for the post liberal and post metaphysical culture of education today The contributors seek to make sense of East Asian experiences of modern education and to find a way to make Confucian philosophy of education compatible with the Western idea of liberal education This book was originally published as a special issue of Educational Philosophy and Theory
