

Biology Chapter 17 Review Sheet

Aristotle's classification system- He classified organisms as either plants or animals. Animals were classified according to the presence or absence of red blood. They were further classified according to their habitat and morphology. Plants were classified by average size and structure as trees, herbs and shrubs.

Carl Linnaeus binomial nomenclature- Linnaeus' method of naming organisms called binomial nomenclature, gives each species a scientific name with two parts.

Taxonomy- the branch of science concerned with classification, especially of organisms

What are the four rules to writing a scientific name?

The first letter of the genus name always is capitalized, but the rest of the genus name and all letters of the species epithet are lowercase- If a scientific name is written in a printed book or magazine, it would be italicized- When a scientific name is written by hand, both parts of the name should be underlined- After the scientific name has been written completely, the genus name will be abbreviated to the first letter in later appearances.

List and define the taxonomic categories

Domain- contains kingdom

Kingdom- contains phylum

Phylum- contains class

Class- contains order

Order- contains families

Family- contains genus

Genus- contains species

Species- a group of organisms that can interbreed with each other

Taxa- a named group of organisms.

Cladistics- taxonomic method that models evolutionary relationships based on shared derived characters and phylogenetic.

Biology, Study Guide Gilbert D. Brum, Larry McKane, Gerald Karp, 1993-10-28 This lively richly illustrated text makes biology relevant and appealing revealing it as a dynamic process of exploration and discovery Portrays biologists as they really are human beings with motivations misfortunes and mishaps much like everyone has Encourages students to think critically solve problems apply biological principles to everyday life

The Gospel of Education Martin Zschoche, 2021-01-02 Re explore teaching from the depths of brain based accelerated learning research that reveals how students learn and respond to classroom environments and teacher interactions By creating a warm and welcoming atmosphere complete with music and fun your students learn how much you care for them and understand their needs Your words are powerful and everything you do or say sends a message consciously or non consciously to your students Through purposeful classroom management and choreographed instruction grab your students attention and keep them so focused there is no time to become distracted or misbehave By removing students fear factors and giving them leadership roles students take ownership of the classroom productively engaging with each other and learning deeply together Turn assessments into a joyful experience of profound learning Be that teacher the students remember fondly years after they leave school the one about whom they say We learned soooo much and we remember it
