Handbook of Culture and Consumer Behavior Sharon Ng, Angela Y. Lee, 2015-03-10 Research on the influence of culture on consumer decision making and consumption behavior has witnessed tremendous growth in the last decade With increasing globalization managers are becoming increasingly aware that operating in multiple markets is crucial for firms survival and growth As the world's growth engine shifts from Europe and North America to Asia and Latin America it has become apparent that an inward looking and domestic focus strategy will not be sustainable in the long run And success in foreign markets requires marketers to understand not just what consumers in these markets need but also how they think behave consume and purchase Numerous studies have documented cultural differences in values and beliefs motivational orientations emotions self regulation and information processing styles and the effects of these cultural variations on consumer behavior such as brand evaluation materialism and impulsive consumption In this volume experts from a variety of disciplines and perspectives trace the historical development of culture research in consumer psychology and examine the theoretical underpinnings that account for these findings and the current state of the field Collectively the chapters provide a forum for researchers to engage in thoughtful debates and stimulating conversations and offer directions for future research

Continuing the Journey to Reposition Culture and Cultural Context in Evaluation Theory and Practice Stafford Hood, Rodney Hopson, Henry Frierson, 2014-12-01 Racial ethnic linguistic and cultural diversity has become of global importance in places where many never would have imagined Increasing diversity in the U S Europe Africa New Zealand and

Asia strongly suggests that a homogeneity based focus is rapidly becoming an historical artifact Therefore culturally responsive evaluation CRE should no longer be viewed as a luxury or an option in our work as evaluators The continued amplification of racial ethnic linguistic and cultural diversity and awareness among the populations of the U S and other western nations insists that social science researchers and evaluators inextricably engage culturally responsive approaches in their work It is unacceptable for most mainstream university evaluation programs philanthropic agencies training institutes sponsored by federal agencies professional associations and other entities to promote professional evaluation practices that do not attend to CRE Our global demographics are a reality that can be appropriately described and studied within the context of complexity theory and theory of change e g Stewart 1991 Battram 1999 And this perspective requires a distinct shift from simple linear cause effect models and reductionist thinking to include more holistic and culturally responsive approaches The development of policy that is meaningfully responsive to the needs of traditionally disenfranchised stakeholders and that also optimizes the use of limited resources human natural and financial is an extremely complex process Fortunately we are presently witnessing developments in methods instruments and statistical techniques that are mixed methods in their paradigm designs and likely to be more effective in informing policymaking and decision making Culturally responsive evaluation is one such phenomenon that positions itself to be relevant in the context of dynamic international and national settings where policy and program decisions take place One example of a response to address this dynamic and need is the newly established Center for Culturally Responsive Evaluation and Assessment CREA in the College of Education at the University of Illinois at Urbana Champaign CREA is an outgrowth of the collective work and commitments of a global community of scholars and practitioners who have contributed chapters to this edited volume It is an international and interdisciplinary evaluation center that is grounded in the need for designing and conducting evaluations and assessments that embody cognitive cultural and interdisciplinary diversity so as to be actively responsive to culturally diverse communities and their aspirations The Center s purpose is to address questions issues theories and practices related to CRE and culturally responsive educational assessment Therefore CREA can serve as a vehicle for our continuing discourse on culture and cultural context in evaluation and also as a point of dissemination for not only the work that is included in this edited volume but for the subsequent work it will encourage

Handbook of Children and Prejudice
Hiram E. Fitzgerald, Deborah J. Johnson, Desiree Baolian Qin, Francisco A. Villarruel, John Norder, 2019-05-21 This handbook examines the effects and influences on child and youth development of prejudice discrimination and inequity as well as other critical contexts including implicit bias explicit racism post immigration processes social policies parenting and media influences It traces the impact of bias and discrimination on children from infancy through emerging adulthood with implications for later years The handbook explores ways in which the expanding social economic and racial inequities in society are linked to increases in negative outcomes for children through exposure to adverse childhood experiences ACEs

Chapters examine a range of ACEs low income separation divorce family substance abuse and mental illness exposure to neighborhood and or domestic violence parental incarceration immigration and displacement and parent loss through death Chapters also discuss discrimination and prejudice within the adverse experiences of African American Asian American European American Latino Native American Arab American and Sikh as well as LGBTQ youth and non binary children Additionally the handbook elevates dynamic aspects of resilience adjustment and the daily triumphs of children and youth faced with issues related to prejudice and differential treatment Topics featured in the Handbook include The intergenerational transmission of protective parent responses to historical trauma The emotional impact of the acting white accusation DREAMers and their experience growing up undocumented in the USA Online racial discrimination and its relation to mental health and academic outcomes Teaching strategies for preventing bigoted behavior in class Emerging areas such as sociopolitical issues gender prejudice and dating violence The Handbook of Children and Prejudice is a must have resource for researchers graduate students clinicians therapists and other professionals in clinical child and school psychology social work public health developmental psychology pediatrics family studies juvenile justice child and adolescent psychiatry and educational psychology

The Oneness Hypothesis Philip J. Ivanhoe, Owen Flanagan, Victoria S. Harrison, Eric Schwitzgebel, Hagop Sarkissian, 2018-06-26 The idea that the self is inextricably intertwined with the rest of the world the oneness hypothesis can be found in many of the world's philosophical and religious traditions Oneness provides ways to imagine and achieve a more expansive conception of the self as fundamentally connected with other people creatures and things Such views present profound challenges to Western hyperindividualism and its excessive concern with self interest and tendency toward self centered behavior This anthology presents a wide ranging interdisciplinary exploration of the nature and implications of the oneness hypothesis While fundamentally inspired by East and South Asian traditions in which such a view is often critical to their philosophical approach this collection also draws upon religious studies psychology and Western philosophy as well as sociology evolutionary theory and cognitive neuroscience Contributors trace the oneness hypothesis through the works of East Asian and Western schools including Confucianism Mohism Daoism Buddhism and Platonism and such thinkers as Zhuangzi Kant James and Dewey They intervene in debates over ethics cultural difference identity group solidarity and the positive and negative implications of metaphors of organic unity Challenging dominant views that presume that the proper scope of the mind stops at the boundaries of skin and skull The Oneness Hypothesis shows that a more relational conception of the self is not only consistent with contemporary science but has the potential to lead to greater happiness and well being for both individuals and the larger wholes of which they are parts
