Recent Advances in Material, Manufacturing, and Machine Learning Rajiv Gupta, Devendra Deshmukh, Awanikumar P. Patil, Naveen Kumar Shrivastava, Jayant Giri, R.B. Chadge, 2023-05-26 The role of manufacturing in a country's economy and societal development has long been established through their wealth generating capabilities. To enhance and widen our knowledge of materials and to increase innovation and responsiveness to ever increasing international needs more in depth studies of functionally graded materials, tailor made materials, recent advancements in manufacturing processes and new design philosophies are needed at present. The objective of this volume is to bring together experts from academic institutions, industries and research organizations and professional engineers for sharing of knowledge, expertise and experience in the emerging trends related to design, advanced materials, processing and characterization and advanced manufacturing processes.

Flood Forecasting and Hydraulic Structures P. V. Timbadiya, Prem Lal Patel, Vijay P. Singh, Vivek L. Manekar, 2023-08-31 This book comprises the proceedings of the 26th International Conference on Hydraulics, Water Resources and Coastal Engineering HYDRO 2021 focusing on broad spectrum of emerging opportunities and challenges in the field of flood forecasting and hydraulic structures. It covers a range of topics including but not limited to early warning system, urban flood modelling and management, dam hazard classification, river training and protection works, structural and non structural measures for flood mitigation, assessment and development of flood vulnerability hazard and risk maps, rehabilitation of old dams, streamflow turbines, canal operation and related structure operation and management of dams including their instrumentation etc. Presenting recent advances in the form of illustrations, tables and text, it offers readers insights for their own research. In addition, the book addresses fundamental concepts and studies in the field of flood forecasting and hydraulic structures, making it a valuable resource for both beginners and researchers wanting to further their understanding of hydraulics, water resources and coastal engineering.

Sedimentation Process and Design of Settling Systems Alak De, 2017-01-16 This book is designed to serve as a comprehensive source of information of sedimentation processes and design of settling systems, especially as applied to design of such systems in civil and environmental engineering. The book begins with an introduction to sedimentation as a whole and goes on to cover the development and details of various settling theories. The book traces the chronological developments of the comprehensive knowledge of settling studies and design of settling systems from 1889. A new concept of Velocity Profile Theorem tool for settling problem analysis has been employed to the analysis of the phenomenon of short circuiting. Complete theory of tube settling has been developed and its application to the computation of residual solids from the assorted solids through the same has been demonstrated. Experimental verification of the tube settling theory has also been presented. Field oriented compatible design and operation methodology of settling system has been developed from the detailed study of a real settling system. New parameter for settling performance comparison appears to do justice for its

purpose Design methodology of high rate settling systems has been presented with worked out examples and the flexibility of control of operation has been shown Lastly along with the presentation of all the theories of Thickener Design the same problem of thickening has been solved with all the methods to reveal the variation in the designed thickeners The contents of this book will be useful to students researchers and professional engineers alike
