Collective Bargaining And Wage Formation Performance And Challenges:

Collective Bargaining and Wage Formation Hannu Piekkola, Kenneth Snellman, 2005-12-06 Hannu Piekkola and Kenneth Snellman ETLA The Research Institute of the Finnish Economy Helsinki Finland The Labour Institute for Economic Research Helsinki Finland 1 The Basic Issues Wages have traditionally been agreed on collectively in Europe The articles in this volume examine the current state of collective bargaining as well as the challenges it is currently facing The issues examined in these papers have a wide applicability to problems on the European labour markets Torben M Andersen and Steinar Holden review challenges from globalisation and inter industry trade and the adaptation to a low inflation environment The other contributions are part of the project investigating collective bargaining in Finland carried out by ETLA the Research Institute of the Finnish Economy and the Labour Institute for Economic Research Some of them use results from a Finnish survey carried out by the two institutes ETLA and the Labour Institute on the views of employers and employees about labour relations and the labour market negotiation system Bargaining systems are complex and their future development depends on their historical evolution recent and past experiences and the current situation in the labour market as well as changes in the international environment By examining the past functioning of the bargaining system one can observe how different elements in it have interacted with various factors in the environment of the system Collective Bargaining and Wage Formation Hannu Piekkola, Kenneth Snellman, 2009-09-03 Hannu Piekkola and Kenneth Snellman ETLA The Research Institute of the Finnish Economy Helsinki Finland The Labour Institute for Economic Research Helsinki Finland 1 The Basic Issues Wages have traditionally been agreed on collectively in Europe The articles in this volume examine the current state of collective bargaining as well as the challenges it is currently facing The issues examined in these papers have a wide applicability to problems on the European labour markets Torben M Andersen and Steinar Holden review challenges from globalisation and inter industry trade and the adaptation to a low inflation environment The other contributions are part of the project investigating collective bargaining in Finland carried out by ETLA the Research Institute of the Finnish Economy and the Labour Institute for Economic Research Some of them use results from a Finnish survey carried out by the two institutes ETLA and the Labour Institute on the views of employers and employees about labour relations and the labour market negotiation system Bargaining systems are complex and their future development depends on their historical evolution recent and past experiences and the current situation in the labour market as well as changes in the international environment By examining the past functioning of the bargaining system one can observe how different elements in it have interacted with various factors in the environment of the system Collective Bargaining and Wages in Comparative Perspective Roger Blanpain, Thomas Blanke, Edgar Rose, Kerstin Ahlberg, 2005-01-01 Remarkably the core element of labour relations wage determination has been excluded from the European social dialogue about harmonisation of working conditions and national systems of social security The present study responds by analysing the prospects of building up

structures of wage formation in Europe through a reevaluation of collective bargaining and collective agreements as they exist under the law of the most industrialized Member States The impetus for the study is the widely debated crisis of the system of concluding regional collective agreements on wages Social partners seem to have been trapped in fruitless conflicts on how the system must be reformed It has become obvious that no party concerned employers trade unions the state has the capacity to resolve the growing difficulties of collective wage formation In an introductory essay by the distinguished editors this important study takes the situation in Germany the most prominent manifestation of this European crisis as its starting point Then academic experts from France the United Kingdom the Netherlands and Sweden describe comparable problems in their own countries detail approaches to dealing with them and provide a critical commentary including judgements and suggestions in relation to the German case Then follows a reexamination of the situation in Germany in the light of the experience of the other countries A final chapter outlines some preliminary interpretations of European prospects Salient issues investigated include the following the erosion of such ideological and legal categories and concepts as dependent work solidarity subsidiarity and social self regulation as preconditions of traditional collective bargaining structures at national level the decreasing membership of the bargaining partners on both sides the shrinking rate of employees covered by collective agreements attempts to establish a national social pact increasing competition on global markets decentralizing management strategies including the abandonment of collective bargaining and individualized employees The authors examine the various state structures to determine if the legal and institutional developments of the different national systems of collective bargaining constitute starting points for mutual learning in order to meet the new challenges This leads to a discussion of which practices are successful in their original environment and how these practices might adapt to other systems in other countries

Economic Prosperity Recaptured Seppo Honkapohja, Erkki A. Koskela, Willi Leibfritz, Roope Uusitalo, 2009-04-03 Many countries have experienced major economic changes since the mid 1980s as a result of the deregulation and liberalization of national financial systems two key aspects of globalization with some experiencing boom and bust in rapid succession The small Northern European country of Finland has been hailed as a success story for achieving renewed economic growth and prosperity after a financial crisis and deep depression in the early 1990s Economic Prosperity Recaptured offers a detailed analysis of the rapid swings in Finland's recent economic development from initial overheating in the late 1980s through deep crisis in the early 1990s to recovery and growth since the mid 1990s Finland's complex road to recovery offers excellent examples of both unsuccessful and successful policy responses to changing circumstances The authors examine the three relatively distinct periods of Finland's recent experience analyzing the adequacy of the macroeconomic policy response in each case They assess the real economic effects of financial constraints and look for evidence of the credit channel of the monetary system Finland's rapid economic growth since the mid 1990s is largely the result of its structural transformation into a high tech economy Nokia is the most famous example of

this information and communication technology success Elaborating on Finland's ICT revolution the authors demonstrate that well designed economic policies contributed to Finland's economic turnaround CESifo Book series **Changing Welfare States** Anton Hemerijck, 2013 Changing Welfare States is a major new examination of the wave of social reform that has swept across Europe over the past two decades In a comparative fashion it analyses reform trajectories and political destinations in an era of rapid socioeconomic restructuring including the critical impact of the global financial crisis on welfare state futures The book argues that the overall scope of social reform across the member states of the European Union varies widely In some cases welfare state change has been accompanied by deep social conflicts while in other instances unpopular social reforms received broad consent from opposition parties trade unions and employer organizations The analysis reveals trajectories of welfare reform in many countries that are more proactive and reconstructive than is often argued in academic research and the media Alongside retrenchments there have been deliberate attempts often given impetus by intensified European economic integration to rebuild social programs and institutions and thereby accommodate welfare policy repertoires to the new economic and social realities of the 21st century Welfare state change is work in progress leading to patchwork mixes of old and new policies and institutions on the lookout perhaps for greater coherence Unsurprisingly that search process remains incomplete resulting from the institutionally bounded and contingent adaptation to the challenges of economic globalization fiscal austerity family and gender change adverse demography and changing political cleavages Collective Bargaining in Labour Law Regimes Ulla Liukkunen, 2019-10-02 This book addresses the theme of collective bargaining in different legal systems and explores legal framework of collective bargaining as well as the role of different bargaining models in domestic labour law systems in altogether twenty one jurisdictions throughout the world Recent development of collective bargaining regimes can be viewed as part of a larger development of labour law models that face increasing challenges caused by globalization and transition of work and workplaces The book places particular emphasis on identifying and examining most important development trends affecting domestic labour law regimes and collective bargaining and regulatory responses thereto The analysis offered extends to transnational dimension of collective bargaining As the chapters analyse the influence of the legal frameworks of collective bargaining in different countries they provide unique comparative insight into the topic which is central to understanding the function of labour law EMU Challenges European Labor Markets Rüdiger Soltwedel, Dirk Dohse, Christiane Krieger-Boden, 1999-09-01 This paper discusses the challenges that European Monetary Union EMU poses for European labor markets emphasizing in particular the regional dimension of the European unemployment problem The authors argue that the inability of labor markets to adjust to shocks is largely a regional problem within EMU member countries requiring structural reforms to enhance labor market flexibility but also a decentralization of competencies and greater diversity of labor market outcomes Any attempt to successfully reform European labor markets and make them fit for EMU has to take into account the regional

and even a more decentralized firm perspective *Economics, Politics and Social Issues in Latin America* Mary P. Lassiter, 2007 Latin America is a diverse group of countries with extremely diverse economies and political dynamics. Some are heavy in poverty and others are booming with petrodollars. They speak Spanish, Portuguese, and French. This book brings together analyses detailing crucial issues at the beginning of the 21st century Challenging Neighbours CPB Netherlands Bureau for Economic Policy Analysis, 2012-12-06 *Challenging Neighbours* provides wide coverage of the German and Dutch economies from an institutional point of view. Pensions, competition policy, labour relations, corporate governance, and health care are among the topics for which the institutional setting and performance of Germany and the Netherlands are compared. The difficulties and successes the countries have in facing pressures from aging population, developments in technology, and global competition are traced back to their institutional roots and lead to mutual lessons for institutional reform for German and Dutch policy makers **The Oxford Handbook of Employment Relations** Adrian Wilkinson, Geoffrey Wood, Richard Deeg, 2014-03-13 There have been numerous accounts exploring the relationship between institutions and firm practices. However, much of this literature tends to be located into distinct theoretical traditional silos such as national business systems, social systems of production, regulation theory, or varieties of capitalism, with limited dialogue between different approaches to enhance understanding of institutional effects. Again, evaluations of the relationship between institutions and employment relations have tended to be of the broad brushstroke nature, often founded on macro data and with only limited attention being accorded to internal diversity and details of actual practice. The Handbook aims to fill this gap by bringing together an assembly of comprehensive and high quality chapters to enable understanding of changes in employment relations since the early 1970s. Theoretically based chapters attempt to link varieties of capitalism, business systems, and different modes of regulation to the specific practice of employment relations and offer a truly comparative treatment of the subject, providing frameworks and empirical evidence for understanding trends in employment relations in different parts of the world. Most notably, the Handbook seeks to incorporate at a theoretical level regulationist accounts and recent work that link bounded internal systemic diversity with change and at an applied level a greater emphasis on recent applied evidence specifically dealing with the employment contract, its implementation, and related questions of work organization. It will be useful to academics and students of industrial relations, political economy, and management.
