Lab 1 Simulation: The Moving Man

Objectives

To explore position and velocity graphs of an object moving in different ways.

Familiarization

There are two tabs for this simulation, called "Introduction" and "Charts." For today's activity, you will need only the "Introduction" tab.

Play with the controls of the simulation to get used to the controls. Can you find...

- ☐ two ways to move the man around?
- ☐ how to make the man move automatically?
- ☐ how to record and playback the man's motion?
- ☐ how to playback the man's motion in slow motion?
- ☐ how to quickly reset the man to starting conditions?

Constant Velocity

1. Reset all of the man's values to zero.
2. Using the position slider, set the man to stand near the tree. Give him a velocity of 1.2 m/s (and an acceleration of 0).
3. Click ▶ to start the man in motion until he hits the wall, then hit II to stop recording.
4. Use the playback feature to answer these questions.
 - a. What happened to the blue position slider as the man moved across the screen?
 - b. What happened to the red velocity slider as the man moved across the screen?
5. Use the playback feature to record the man's position and velocity data.
