

CONNECTICUT STATE DEPARTMENT OF EDUCATION
Common Core of Teaching (CCT) Rubric for Effective Teaching

The Common Core of Teaching (CCT) Instrument will be used to evaluate teacher performance and practice as required in the Connecticut Guidelines for Educator Evaluation and the System for Educator Evaluation and Development (SEED). The CCT Instrument will be used to determine 40% of a teacher's summative rating.

Each teacher shall be observed at a minimum as stated in the Connecticut Guidelines for Educator Evaluation. All observations should be followed by feedback, either verbal (e.g., a post-conference, comments about professional meetings/presentations, etc.) or written (e.g., via email, comprehensive write-up, etc.) or both, within days of an observation. Specific actionable feedback is also used to identify teacher development needs and tailor support to those needs. Further guidance on the observation protocol each teacher is provided in the Connecticut Guidelines for Educator Evaluation or in the SEED state model www.connecticutseed.org.

The CCT Instrument will be used by trained and proficient evaluators to observe a teacher, including the following processes:

- A. **Pre-Conference:** Before each observation, the evaluator will review planning documentation and other relevant and supporting artifacts provided by the teacher in order to understand the context for instruction, including but not limited to, the learning objectives, curricular standards alignment, differentiation of instruction for particular students, assessments used before or during instruction, resources and materials.
- B. **Observation:** The observation of practice may include formal or informal in-class observation, non-classroom observations or reviews of practice.
- C. **Post-Conference:** The post-observation conference gives the teacher the opportunity to reflect on and discuss the lesson/practice observed, progress of students, adjustments made during the lesson, further supporting artifacts as well as describe the impact on future instruction and student learning.
- D. **Analysis:** The evaluator analyzes the observation and other documentation for either formal or informal observations or reviews of practice and records the information as necessary and identifies the applicable performance descriptors contained in the CCT rubric.
- E. **Ratings:** Based on the training guidelines and decision rules for the CCT Instrument, the evaluator will provide domain level ratings and an overall rating.

The CCT rubric was developed with input from a team of regional educational service center instructional experts, practitioners and a team of CSDE assessment experts. It is based on the CCT competencies adopted by the State Board of Education in February 2010. The rubric focuses upon Domains 2 through Domains 6 of the original CCT competencies. Domain 1, *Content and Essential Skills, which includes the Common Core State Standards (CCSS) and/or state and national content standards is intended for demonstration at the pre-service level, as a pre-requisite to certification, but is also reflected and embedded in this rubric in the planning, instruction, assessment and professional responsibilities domains.* Because teaching is a complex, integrated activity, to develop this rubric, the domain indicators from the original CCT have been consolidated or reorganized for purposes of describing essential and critical aspects of a teacher's performance. The CCT rubric represents the criteria in which evaluators will be trained to describe the level of performance observed. **NOTE:** for the evaluation of non-classroom based educators such as intervention specialists, special service providers and others, an appendix to the rubric will be developed to address the performance criteria to guide the evaluation of these educators.

Accurate and reliable evaluation of these competencies and indicators can only be achieved through careful, rigorous training and demonstrated proficiency that build upon the experience base and professional judgment of the educators who use this instrument. The CCT Rubric should never be used without the grounding provided by experience and training. As part of the training, evaluators will be provided sample performances and artifacts, and decision rules to guide their ratings. The CCT Instrument is not a checklist with predetermined points. Rather it is a tool that is combined with training to ensure consistency and reliability of the observational evaluation decisions.

The CSDE will conduct pilot and validation studies of the CCT Instrument during the 2013-14 school year and thereafter to ensure technical sufficiency and legal defensibility. Data from these studies will inform further revision to the CCT Instrument and training of evaluators.

Teaching for Creativity in the Common Core Classroom Ronald A. Beghetto, James C. Kaufman, John Baer, 2015 Creativity and the Common Core State Standards are both important to today s teachers Yet for many educators nurturing students creativity seems to conflict with ensuring that they learn specific skills and content In this book the authors outline ways to adapt existing lessons and mandated curricula to encourage the development of student creativity alongside more traditional academic skills Based on cutting edge psychological research on creativity the text debunks common misconceptions about creativity and describes how learning

environments can support both creativity and the Common Core offers creative lessons and insights for teaching English language arts and mathematics and includes assessments for creativity and Common Core learning Featuring numerous classroom examples this practical resource will empower teachers to think of the Common Core and creativity as encompassing complementary rather than mutually exclusive goals Book Features Shows how teaching skills mandated by the CCSS and teaching for creativity can reinforce one another Helps teachers better understand what creativity is how to develop it and how to assess it in meaningful ways Examines the many misconceptions about creativity that prevent teachers from doing their best work Provides classroom examples ideas and lesson plans from successful teachers across disciplines This wonderful book makes the important point that teaching to well designed standards is completely consistent with teaching for creativity It is filled with practical advice for teachers about how to teach to Common Core standards in both ELA and math in ways that lead to creative learning outcomes Keith Sawyer Morgan Distinguished Professor in Educational Innovations University of North Carolina at Chapel Hill Beghetto and Baer make a strong nuanced case that knowledge for the sake of knowledge may be acceptable for immediate retention but knowledge in the service of creating new possibilities has long term consequences that can t be ignored by educators and society Scott Barry Kaufman scientific director The Imagination Institute and researcher Positive Psychology Center University of Pennsylvania
