Lesson Concept	The digestive system consists of the mouth/teeth, esophagus, stomach, small and large intestine, colon, rectum/anus. (Teacher Note: The pancreas, liver, and gall bladder also play a role in the digestive system but they are not addressed here because they are not in the California standards for grade 5.)
Link	In the previous lesson, students learned about how digestions begin in the mouth. In this lesson, students will learn the structure and function of the other organs of the digestive system. In the next lesson, students will show their understanding of the digestive system in a creative writing.
