Introduction to Medical Humanities Renzo Pegoraro, Luciana Caenazzo, Lucia Mariani, 2022-10-04 This book proposes an integrated and interdisciplinary approach recording and interpreting the human experience of illness disability care and medical intervention In our age of deeply technologically driven medicine it is crucial to re establish and promote the neglected relationship between medicine and the arts This textbook contains contributions by scholars in various fields who offer their qualified insights in order to reflect on illness medicine and the role of physicians and nurses All chapters overcome a reductive conception of a medicine that is only able to biologically explain illness All three editors of this book are researchers in Padua a city that has been described as the cradle of modern medicine Galileo Galilei taught for eighteen years at the University of Padua and developed the scientific method there During the same period Padua was also the nursery of arts as Shakespeare wrote In fact Padua developed especially in the XIV XV and XVI centuries an impressive and unique artistic culture thanks to artists such as Giotto Donatello and Titian Finally the city of Saint Anthony is a place where a religious feeling strongly oriented towards charity is deeply rooted and strictly linking its history to that of its hospital This textbook is a unique resource for students of medicine nursing bioethics psychology theology and history of art
