Central Asian Security Trends Views From Europe And Russia:

Central Asian Security Trends Strategic Studies Institute, 2011-04-01 The war in Afghanistan has made Central Asia an ever more important strategic theater and one over which many states compete to exert influence This monograph comprehensively analyzes Russia's efforts to exert its influence in the region through 2010 *Central Asian Security Trends* Stephen Blank, Army War College (U.S.). Strategic Studies Institute, 2011 The war in Afghanistan has added considerably to the strategic significance of Central Asia due to its proximity to the conflict Moreover the continuation of the war increasingly involves the vital interests of many other actors other than the U S and NATO forces currently there This monograph taken from SSI's conference Contemporary Issues in International Security with European and Russian scholars in 2010 provides a comprehensive analysis of the means and objectives of Russia's involvement in Central Asia It provides Russian perspectives concerning the other actors in Central Asia and how Moscow views the policy significance of those efforts and a French analysis of the strategic situation evolving there For obvious reasons the war in Afghanistan proximity to major global actors large energy holdings and for less obvious reasons i e that possibility that domestic instability in one or more of these states could spread to other Muslim states as we now see in the Arab revolutions of 2011 Central Asia is an increasingly important and interesting region *Central Asian Security Trends* Stephen Blank, 2014-11-20 The papers collected in this volume pertain to Central Asia Indeed they offer us two foreign views of the strategic situation evolving there a Russian and a French analysis For obvious reasons the war in Afghanistan proximity to major global actors large energy holdings and for less obvious reason i e the possibility that domestic instability in one or more of these states could spread to other Muslim states as we now see in the Arab revolutions of 2011 Central Asia is an increasingly important and interesting strategic region As such it merits sustained critical attention and analysis of the sort we are presenting here and that we have presented in the past We also intend to continue doing so in the future Yet for all of Central Asia's growing importance it is a hard area to grasp analytically To nonspecialists it is likely to be something of a terra incognita an unknown region whose landmarks impart a sense of unfamiliarity even unease to those coming from the outside to try and understand it Yet at the same time even for specialists its reality is elusive and debates abound as to the nature of its domestic politics in both individual states and across the region Moreover the question of the stability of either individual states or of the region a key question for foreign policymakers and analysts is one of the most contested of the questions currently being debated *Central Asian Security Trends* Stephen J. Blank, Strategic Studies Institute, U. S. Army War College, 2013-06-03 **Globalizing Central Asia** Marlene Laruelle, Sebastien Peyrouse, 2015-02-12 In this global era Central Asia must be understood in both geo economic and geopolitical terms The region's natural resources compel the attention of rivalrous great powers and ambitious internal factions The local regimes are caught between the need for international collaborations to valorize these riches and the need to maintain control over them in the interest of state

sovereignty Russia and China dominate the horizon with other global players close behind meanwhile neighboring countries are fractious and unstable with real potential for contagion This pathbreaking introduction to Central Asia in contemporary international economic and political context answers the needs of both academic and professional audiences and is suitable for course adoption *Central Asian Security Trends* Stephen Blank,2011-04-01 President Barack Obama has outlined a comprehensive strategy for the war in Afghanistan which is now the central front of our campaign against Islamic terrorism That strategy strongly connects our prosecution of that war to our policy in Pakistan and internal developments there as a necessary condition of victory But it has also provided for a new logistics road through Central Asia In this monograph Dr Blank argues that a winning strategy in Afghanistan depends as well upon the systematic leveraging of the opportunity provided by that road and a new coordinated nonmilitary approach to Central Asia That approach would rely heavily on improved coordination at home and the more effective leveraging of our superior economic power in Central Asia to help stabilize that region so that it provides a secure rear to Afghanistan In this fashion we would help Central Asia meet the challenges of extremism of economic decline due to the global economic crisis and thus of political stability in states that are likely to be challenged by the confluence of those trends This monograph therefore contributes directly to the debate on U S strategy in Afghanistan and Central Asia and duly represents a part of the Strategic Studies Institute s continuing efforts to participate in and help shape that debate over U S strategy and policy The topic could not be more timely and we hope that it will influence those ongoing debates about U S strategy in Afghanistan and Central Asia Strategic Studies Institute
