**Centres of Medical Excellence?** Andrew Cunningham, 2016-12-05 Students notoriously vote with their feet seeking out the best and most innovative teachers of their subject The most ambitious students have been travelling long distances for their education since universities were first founded in the 13th century making their own educational pilgrimage or peregrinatio This volume deals with the peregrinatio medica from the viewpoint of the travelling students who went where how did they travel what did they find when they arrived what did they take back with them from their studies Even a single individual could transform medical studies or practice back home on the periphery by trying to reform teaching and practice the way they had seen it at the best universities Other contributions look at the universities themselves and how they were actively developed to attract students and at some of the most successful teachers such as Boerhaave at Leiden or the Monros at Edinburgh The essays show how increasing levels of wealth allowed more and more students to make their pilgrimages travelling for weeks at a time to sit at the feet of a particular master In medicine this meant that over the period c 1500 to 1789 a succession of universities became the medical school of choice for ambitious students Padua and Bologna in the 1500s Paris Leiden and Montpellier in the 1600s and Leiden G ttingen and Edinburgh in the 1700s The arrival of foreign students brought wealth to the university towns and this significant economic benefit meant that the governors of these universities tried to ensure the defence of freedom of religion and freedom of speech thus providing the best conditions for the promotion of new views and innovation in medicine The collection presents a new take on the history of medical education as well as universities travel and education more widely in ancien r gime Europe *NTU at 80 ; Going for the Top 100*, 2008-01-01

**Uk Centre for Medical Research and Innovation (Ukcmri)** Great Britain: Parliament: House of Commons: Science and Technology Committee, Great Britain. Parliament. House of Commons. Select Committee on Science and Technology, 2011 The Science and Technology Committee today agrees with and commends the scientific vision for the new UK Centre for Medical Research and Innovation but expresses reservations about the project s location It says the case for the centre s central London location near St Pancras station was not overwhelming and it could have been sited elsewhere The advantages of co location with universities and hospitals and access to good transport links which the Committee accepts play a fundamental role in the centre s vision come at a price extra construction costs a site incapable of expansion and the concentration of medical sciences in the golden triangle in the south of England On the issue of funding the Committee s concerns about the project s costs were assuaged by evidence from the Government that the taxpayer will not be liable to any further costs should the project overrun On the management structure the committee was told that an experienced team with a proven track record were now taking charge The Committee is sympathetic to the local community s concerns about the project and recognises attempts made by the centre s management to engage with the local community but says it is saddened that efforts have not been as successful as they might have been One way some benefit could accrue

back to the local community is to ensure that the land released from the National Temperance Hospital site the original site intended for the UKCMRI is used for housing including social housing
