Geography and Social Movements Byron A. Miller, 2000

Context matters as students of social movements increasingly agree and yet very little attention has been paid to the role geography plays in activism Geography and Social Movements corrects this oversight bringing a geographical perspective to the study of social movements Byron A Miller directly addresses the implications of space place and scale in social movement mobilization and then demonstrates their significance in a detailed comparative analysis of peace movements in three municipalities around Boston In focusing on the Boston area an old northeastern region heavily industrialized with many companies working on military contracts and also a center of education Miller is able to explore how campaigns aimed at curbing nuclear arms operate within the cultural political social and economic confines of particular places and spaces He shows how the decisions and actions of local peace movement organizations played a central role in the movement's successes and failures and how local organizations had to respond to the differing class race and gender characteristics of different locales Miller's empirical analysis clearly demonstrates that geographic strategies for social movement organizations have direct consequences for the successes and failures of specific campaigns
