De Flora Van Nederland:

De flora van Nederland Cornelis Antoon Jan Abraham Oudemans, 1862 **De flora van Nederland** Corneille Antoine Jean Abraham Oudemans, 1862 De flora van Nederland Hendrik Heukels, 1911 De Flora van Nederland ten behoeve van het algemeen beschreven door C. A. J. A. Oudemans Corneille Antoine Jean Abram Oudemans, 1862 **Atlas of the Netherlands Flora** J. Mennema, A.J. Quene-Boterendrood, C.L. Plate, 2013-12-11 There is an element of fascination which many people feel about geographical maps because these maps allow fantasies about strange landscapes other peoples travels even adventures Distribution maps depicting the area which a plant or animal species occupies would appear to be less romantic but they are equally able to exercise our imagination or rather to stimulate our scientific curiosity Some distribution patterns are repeated time and time again although rarely fully identical and with their study comes the inescapable question what is it that determines a plant's area of distribution Almost immediately we find ourselves in the area of ecology for it is the plant's demands of its environment climate soil which determines where it will be able to grow and where not However that is not all there is to it for species as well as landscapes have their history and one needs to be informed about the climate and about the distribution of land and sea in the past for instance before one can understand present distributions This aspect of change in space and time historical plant geography is possibly the most fascinating part of plant geography However this atlas covering a minuscule part of the world is not meant to be primarily a book of historical plant geography It is true that a dynamic aspect is very prominent but this is on the smaller time scale of man made changes which mostly led to impoverishments **De flora van Nederland** Cornelis Antoon Jan Abraham Oudemans, 1874 **Guide to Standard Floras of the World** David G. Frodin, 2001-06-14 This 2001 book provides a selective annotated bibliography of the principal floras and related works of inventory for vascular plants The second edition was completely updated and expanded to take into account the substantial literature of the late twentieth century and features a more fully developed review of the history of floristic documentation The works covered are principally specialist publications such as floras checklists distribution atlases systematic iconographies and enumerations or catalogues although a relatively few more popularly oriented books are also included The Guide is organised in ten geographical divisions with these successively divided into regions and units each of which is prefaced with a historical review of floristic studies In addition to the bibliography the book includes general chapters on botanical bibliography the history of floras and general principles and current trends plus an appendix on bibliographic searching a lexicon of serial abbreviations and author and geographical indexes **Heukels' flora van Nederland** R. van der Meijden, 1996 Algemeene aardrijkskundige bibliographie van Nederland , 1888 *De Flora Van Nederland* Hendrik Heukels, 1909
