Inside Education Stephen O'Brien, 2015-12-22 To learn more about learning what it is and how it works it is necessary to look inside education Inside Education takes the reader on a journey of four live education projects the first all Irish speaking mixed gendered multi faith primary school in the Republic of Ireland ideally suited to exploring learning identity an alternative post primary school for those who leave or are left behind by the formal education system also based in the Republic of Ireland and ideally suited to exploring personal learning an early college school that enables students to simultaneously sit their high school diploma and college exams based in Queens New York and ideally suited to exploring

learning success and an adult education training centre that works with landless movement members based in Brazil and ideally suited to exploring learning power Using a critical ethnography approach each research narrative naturally unfolds enfold to tell a more complete learning story All those interested in education are primed readers By re viewing their own learning outlook they may begin to advance deeper critical ideas and debates in education They may come to re represent education reminding public consciousness of its human stories as well as its curious intricate and powerful qualities And they may re discover other roads to raise a scholar Teachers educational researchers parents and guardians will be particularly interested readers Inside Education is a thought provoking challenging and revealing journey inside the world of education and learning Its exploration of school and classroom practices in a range of different settings provides important insights into how we learn a central aspect of our education system which remains overlooked and understudied In doing so it lays down a challenge to policy makers and educators everywhere to think differently about the way we learn and ultimately help students fulfil their real potential Carl O'Brien Chief Reporter for The Irish Times Inside Education is a stunning example of passionate scholarship that nonetheless refuses a redemptionist stance The ethnography captures people and contexts and draws the reader into the four sites of learning in fluent and lyrical prose This is facilitated by the extensive use of research notes deploying historical comparative literary artistic and scholarly sources Denis O'Sullivan Emeritus Professor of Education University College Cork Ireland

Numbers 10 20 and Counting to 10 and Analyzing Comparing and Composing Shapes *Getting to the Common Core*
Sharon L. Spencer, Sandra Vavra, 2015-01-01 The Common Core Standards have recently been adopted in most states across the nation and teachers are in the process of getting to the core of these standards Teaching to standards is not a new concept teachers have adapted to new standards every few years for quite some time And teachers are adaptable as can be seen in this book We are writing this book to demonstrate how teachers use research based strategies to meet Common Core Standards while still focusing on students Our goal is to help teachers visualize students in action as other teachers describe the implementation of research based strategies in their own classrooms show student work samples and provide reflections of student success in achieving the standards Many Common Core Standards books focus on the standards but our approach focuses on strategies that engage the students in the classroom showing how different teachers at varying grade levels have used the strategies to meet the standards With this focus we believe that teachers gain a new and positive perspective on approaching the new standards and see the flexibility of strategies for meeting standards across subject areas We have examined research on the strategies with the purpose of giving teachers a brief description of why these strategies work before giving actual examples from classrooms We also work closely with teachers in the public schools and have our finger on the pulse of what is happening in the public schools one of the current stressors being unpacking the Common Core Standards This book actually focuses on practice We begin by laying out a rationale in our first chapter The Core Value s of Education Then each chapter focuses on a strategy including 1 a brief description about the research supporting each strategy and 2 several examples from different grade levels which include a description of how the strategy was used student work samples and a reflection on the use of the strategy The research descriptions are fairly short because while we believe professional educators aka teachers in this case should know the research that supports practice we know they are not typically interested in long diatribes about the research
