heavily illustrated book **Smartphones from an Applied Research Perspective** Nawaz Mohamudally, 2017-11-02

Smartphones from an Applied Research Perspective highlights latest advancements of research undertaken in multidisciplinary fields where the smartphone plays a central role. Smartphone is synonymous to innovation in today's society. Very few visionaries predicted its social, cultural, technological, and economic impacts, although the usage of smartphone is almost pervasive and transcendental. This book is meant for researchers and postgraduate students looking forward for hot topics for their final year projects, doctoral or even postdoctoral studies. Practitioners too will find food for thought and will surely be amazed by the broadness of the topics presented.

Design Thinking
Michael G. Luchs, Scott Swan, Abbie Griffin, 2015-09-25. Develop a more systematic, human-centered, results-oriented thought process. Design Thinking is the Product Development and Management Association's PDMA guide to better problem solving and decision making in product development and beyond. The second in the New Product Development Essentials series, this book shows you how to bridge the gap between the strategic importance of design and the tactical approach of design thinking. You'll learn how to approach new product development from a fresh perspective with a focus on systematic, targeted thinking that results in a repeatable, human-centered problem-solving process. Integrating high-level discussion with practical, actionable strategy, this book helps you re-tool your thought processes in a way that translates well beyond product development, giving you a new way to approach business strategy and more. Design is a process of systematic creativity that yields the most appropriate solution to a properly identified problem. Design thinking disrupts stalemates and brings logic to the forefront of the conversation. This book shows you how to adopt these techniques and train your brain to see the answer to any question at any level in any stage of the development process. Become a better problem solver in every aspect of business. Connect strategy with practice in the context of product development. Systematically map out your new product, service, or business. Experiment with new thought processes and decision-making strategies. You can't rely on old ways of thinking to produce the newest, most cutting-edge solutions. Product development is the bedrock of business; whether your product is a tangible object, a service, or the business itself, and your approach must be consistently

and reliably productive Design Thinking helps you internalize this essential process so you can bring value to innovation and merge strategy with reality
