Geriatric Mental Health Ethics Shane S. Bush, 2008-09-30 The book's genuine value is that it provides the reader with a solid foundation in ethical competence The ten step ethical decision making model described is a clear structured roadmap to aid in the resolution of common ethical problems A welcome resource to all geriatric mental health students practitioners and educators From the Afterword by Frank A Cervo MD Long Island State Veterans Home

Stony Brook University School of Medicine Detailed case studies will guide practitioners through Bush's Four A's of ethical decision making: Anticipating and preparing for ethical issues commonly encountered in specific contexts; Avoiding ethical misconduct; Addressing ethical challenges with specific strategies and goals; Aspiring to even higher standards of ethical decision making and practice. Making informed ethical decisions and choosing the right course of action with elderly patients can prove difficult for mental health practitioners. This is especially true when patients suffer from Alzheimer's disease or other disorders that impair their own decision making abilities. When confronting dilemmas concerning privacy, informed consent, and patient autonomy, use of an ethical decision making model is essential. In this book, Bush not only presents this practical 10-step model but through a diverse collection of case studies also demonstrates how it can be implemented across numerous therapeutic settings. Nursing, social work, counseling, and psychiatry are only four of the many settings discussed. In essence, the author offers a truly unique interdisciplinary approach to ethical decision making in geriatric mental health care.

Gerontological Practice for the Twenty-first Century Virginia E. Richardson, Amanda Smith Barusch, 2006

Gerontological Practice for the Twenty-first Century provides state-of-the-art information on practice approaches with older patients that are age-specific and empirically based. Part 1 reviews current and classic theories of aging and proposes an original framework to practice that incorporates both individual and policy-level interventions. Part 2 covers such psychological problems as anxiety, depression, suicide, substance abuse, and dementia and describes appropriate evidence-based interventions. Part 3 discusses working with older families, end-of-life care, bereavement, and work and retirement, and part 4 focuses on core sociopolitical issues in the lives of older people, such as economic policy, poverty, health policy, quality of life, concerns, and social services. Designed as a text for students and as a professional resource for practitioners, this book is a comprehensive review of the current literature and contains authoritative information on issues relating to a vulnerable population in need of sophisticated care.

Psychiatric Mental Health Nursing Sheila L. Videbeck, 2006 The revised and updated Third Edition of this popular text explores the full psychiatric nursing care continuum from the fundamentals of sound nursing theory to therapeutic applications and clinical modalities for the major DSM-IV-TR disorders. Using the nursing process as its framework, the text emphasizes assessment, therapeutic communication, neurobiology, and psychopharmacologic intervention, all in a reader-friendly format that promotes self-awareness, effective communication, and the use of family and community resources. **BOOK JACKET**
