VIKAS GOEL, Preface Democracy in Action Structures Systems and Struggles is an

exploration of one of humanity's most enduring and evolving ideals democracy This book seeks to illuminate not only the institutional frameworks and political philosophies that underpin democratic governance but also the social cultural and technological forces that continue to shape its practice across the world Democracy at its heart is not a static concept it is a living process of negotiation between power and people freedom and responsibility ideals and realities The book thus journeys through its origins evolution and modern complexities offering a comprehensive understanding of how democratic systems function adapt and sometimes falter Beginning with the intellectual foundations of democracy in ancient civilizations and moving through its modern transformations the chapters trace the interplay between constitutional structures electoral systems political parties and civic movements that give life to democratic governance From the design of representative institutions to the pressures of globalization technology and media the text unpacks how democracy both shapes and is shaped by the societies that practice it In doing so it invites readers to reflect on the balance between institutions and individuals governance and participation rights and duties In today's world marked by populism polarization misinformation and the blurring of national boundaries the meaning of democracy is being re-examined more urgently than ever This book acknowledges these tensions while remaining grounded in the belief that democracy's strength lies in its capacity for self-correction dialogue and reform It also emphasizes the moral dimension of democracy its connection to human rights equality and justice drawing attention to the struggles and movements that have expanded its promise across continents and centuries Each chapter of Democracy in Action builds upon the last to provide a multidimensional perspective from the architecture of constitutions and the pulse of electoral systems to the voices of citizens activists and institutions that sustain the democratic fabric The final chapter turns toward the future posing critical questions about how democracy can endure and adapt in an era of artificial intelligence climate challenges and geopolitical shifts This book is intended for students scholars and citizens alike those who seek to understand not only how democracies are built but how they can be strengthened It is both a study and a call to action to view democracy not as a finished structure but as an ongoing struggle and shared responsibility a testament to the human pursuit of dignity representation and justice Authors Jamuna Devi Rajnish Lather Jyoti Janardhan Reddy Prof Dr Punit Goel
