Chinas Telecommunications Revolution:

China's Telecommunications Revolution Eric Harwit, 2008-02-28 China's telecommunications industry has seen revolutionary transformation and growth over the past three decades. Chinese Internet users number nearly 150 million and the PRC expects to quickly pass the US in total numbers of connected citizens. The number of mobile and fixed line telephone users soared from a mere 2 million in 1980 to a total of nearly 800 million in 2007. China has been the most successful developing nation in history for spreading telecommunications access at an unparalleled rapid pace. This book tells how China conducted its remarkable telecommunications revolution. It examines both corporate and government policy to get citizens connected to both voice and data networks, looks at the potential challenges to the one party government when citizens get this access, and considers the new opportunities for networking now offered to the people of one of the world's fastest growing economies. The book is based on the author's fieldwork conducted in several Chinese cities as well as extensive archival research. It focuses on key issues such as building and running the country's Internet, mobile phone company rivalry, foreign investment in the sector, and telecommunications in China's vibrant city of Shanghai. It also considers the country's internal digital divide and questions how equitable the telecommunications revolution has been. Finally, it examines the ways the PRC's entry to the World Trade Organization will shape the future course of telecommunications growth.

The Huawei Model Yun Wen, 2020-11-30 In 2019 the United States trade war with China expanded to blacklist the Chinese tech titan Huawei Technologies Co Ltd. The resulting attention showed the information and communications technology (ICT) firm entwined with China's political economic transformation. But the question remained: why does Huawei matter? Yun Wen uses the Huawei story as a microcosm to understand China's evolving digital economy and the global rise of the nation's corporate power. Rejecting the idea of the transnational corporation as a static institution, she explains Huawei's formation and restructuring as a historical process replete with contradictions and complex consequences. She places Huawei within the international political economic framework to capture the dynamics of power structure and social relations underlying corporate China's globalization. As she explores the contradictions of Huawei's development, she also shows the ICT firm's complicated interactions with other political economic forces. Comprehensive and timely, *The Huawei Model* offers an essential analysis of China's dynamic development of digital economy and the global technology powerhouse at its core.

Technomobility in China Cara Wallis, 2015-03-06 Winner of the 2014 Bonnie Ritter Book Award, Winner of the 2013 James W. Carey Media Research Award. As unprecedented waves of young rural women journey to cities in China, not only to work but also to see the world and gain some autonomy, they regularly face significant institutional obstacles as well as deep-seated anti-rural prejudices. Based on immersive fieldwork, Cara Wallis provides an intimate portrait of the social, cultural, and economic implications of mobile communication for a group of young women engaged in unskilled service work in Beijing, where they live and work for indefinite periods of time. While simultaneously situating her work within the fields of feminist

studies technology studies and communication theory Wallis explores the way in which the cell phone has been integrated into the transforming social structures and practices of contemporary China and the ways in which mobile technology enables rural young women a population that has been traditionally marginalized and deemed as backward and other to participate in and create culture allowing them to perform a modern rural urban identity In this theoretically rich and empirically grounded analysis Wallis provides original insight into the co construction of technology and subjectivity as well as the multiple forces that shape contemporary China The Chinese Corporate Ecosystem Colin S. C. Hawes,2022-08-04 Illuminates Chinese corporate behaviour through vivid case studies of leading corporations interacting with their political and natural human ecosystems Zoning China Luzhou Li,2024-02-06 An examination of cultural zoning in China considers why government regulation of online video is so much more lenient than regulation of broadcast television In Zoning China Luzhou Li investigates why the Chinese government regulates online video relatively leniently while tightly controlling what appears on broadcast television Li argues that television has largely been the province of the state even as the market has dominated the development of online video Thus online video became a space where people could question state media and the state s preferred ideological narratives about the nation history and society Li connects this relatively unregulated arena to the second channel that opened up in the early days of economic reform piracy in all its permutations She compares the dual cultural sphere to China s economic zoning the marketized domain of online video is the cultural equivalent of the Special Economic Zones which were developed according to market principles in China s coastal cities Li explains that although the relaxed oversight of online video may seem to represent a loosening of the party state s grip on media the practice of cultural zoning in fact demonstrates the the state s strategic control of the media environment She describes how China s online video industry developed into an original creative force of production and distribution that connected domestic private production companies transnational corporations and a vast network of creative labor from amateurs to professional content creators Li notes that China has increased state management of the internet since 2014 signaling that online and offline censorship standards may be unified Cultural zoning as a technique of cultural governance however will likely remain
