industries given their predominance on the list of restricted items for bilateral trade. It also covers studies on unconventional and under researched themes concerning informal trade, informational barriers to India-Pakistan trade and opening new land borders for trade, all of which can play a facilitating role in realizing the untapped trade potential between India and Pakistan. The book also includes the second round of the India-Pakistan trade perception survey which identifies impediments to India-Pakistan bilateral trade and assesses the change in traders' perceptions since the first round of the survey which was published in 2014.

The New Domestic Automakers in the United States and Canada A.J. Jacobs, 2015-12-16. Over the past forty years, state, provincial and local governments in the United States and Canada have provided foreign automakers with approximately \$4.80 billion in incentives in order to lure light vehicle assembly plants to their areas. This has included tax abatements, infrastructure construction, land giveaways, job training programs and other subsidies. As of early 2015, ten foreign vehicle makers operated 20 light vehicle plants in developed North America. Despite the fact that all ten of these automakers have pursued a similar pattern, first exporting vehicles into the United States and Canada before launching vehicle plants in developed North America, each has followed its own specific historical development path and has created its own unique growth trajectory. This book provides a unique historical and qualitative review of these ten vehicle makers from their early beginnings to their export entry into the United States and/or Canada through early 2015. In addition, it chronicles the histories of more than a dozen former automakers and potential future foreign light motor vehicle assembly plants in the United States and Canada. This includes the first foreign automaker to build its cars in the United States, De Dion Bouton of France, in July 1900; the early 20th Century endeavors of Fiat, Mercedes and Rolls Royce; and the present day hopes of Chinese and Indian automakers. In the process, the text also provides an assessment of the top competing states and sites for any future plants, the possible incentives packages governments may offer to attract such facilities and an estimated incentive value for each automaker. Overall, the goal of this book is to expand the knowledge of policymakers at all tiers of government in the United States and Canada and to help them take a more holistic look at the pros and cons of attracting Automobile Manufacturing FDI. It is hoped that this will enable them to make more informed decisions when pursuing a new foreign motor vehicle assembly plant. Its findings should also prove informative to urban and regional planning, political science, sociology, economics, labor and international development scholars and students in North America and worldwide.

A Million Cars For A Billion People Gautam Sen, 2015-02-27. Can one car transform a nation? The Ford Model T did so a century ago when it replaced the horse, brought about a revolution in agriculture, became a stimulus to urbanization that eventually changed the landscape of America. Though the Maruti 800, the Tata Indica, the Hyundai Santro and the Maruti Alto became engines of growth for India, these cars neither drove away the cow nor changed the way Indians travelled. Tata's Nano was expected to change all that and become the ultimate people's car, capturing the imagination of the middle class across nations and cultures. In spite of its petite dimensions, the Nano was meant to stand tall. Yet it did not. What caused it to fail and

fall from grace despite being lauded as the right product at the right time and the most significant new car since the Ford Model T was introduced 100 years ago But is it really all over or is there still hope for India's little wonder What will the people's cars of tomorrow be like A Million Cars for a Billion People delves into the questions concerns and doubts as well as the many misconceptions and myths that have gathered momentum over the years about India's automotive history and the industry's mission to create a true people's car The very first cars that came to India the early beginnings of the industry the nascent history of the automobile across nations like Germany France US the UK Italy Japan and South Korea is narrated with authority and charm from the viewpoint of the quest for the ultimate people's car
