Ancient Ocean Crossings Stephen C. Jett, 2017-06-06 Paints a compelling picture of impressive pre Columbian cultures and Old World civilizations that contrary to many prevailing notions were not isolated from one another In Ancient Ocean Crossings Reconsidering the Case for Contacts with the Pre Columbian Americas Stephen Jett encourages readers to reevaluate the common belief that there was no significant interchange between the chiefdoms and civilizations of Eurasia and Africa and peoples who occupied the alleged terra incognita beyond the great oceans More than a hundred centuries separate the time that Ice Age hunters are conventionally thought to have crossed a land bridge from Asia into North America and the arrival of Columbus in the Bahamas in 1492 Traditional belief has long held that earth's two hemispheres were essentially cut off from one another as a result of the post Pleistocene meltwater fed rising oceans that covered that bridge The oceans along with arctic climates and daunting terrestrial distances formed impermeable barriers to interhemispheric communication This viewpoint implies that the cultures of the Old World and those of the Americas developed independently Drawing on abundant and concrete evidence to support his theory for significant pre Columbian contacts Jett suggests that many ancient peoples had both the seafaring capabilities and the motives to cross the oceans and in fact did so repeatedly and with great impact His deep and broad work synthesizes information and ideas from archaeology geography linguistics climatology oceanography ethnobotany genetics medicine and the history of navigation and seafaring making an innovative and persuasive multidisciplinary case for a new understanding of human societies and their diffuse but interconnected development

Maritime Studies in the Wake of the Byzantine Shipwreck at Yassiada, Turkey Deborah N Carlson, Justin Leidwanger, Sarah M. Kampbell, 2015-03-15 In 2007 a symposium was held at Texas A M University to celebrate the twenty fifth anniversary of Texas A M University Press's publication of the first volume reporting the Yassiada shipwreck site Seventeen papers from that symposium featured in this book broadly illustrate such varied topics as ships and seafaring life maritime trade naval texts commercial cargoes and

recent developments in the analysis of the Yassiada ship itself **Maritime Societies of the Viking and Medieval World**
James H. Barrett, Sarah Jane Gibbon, 2016-11-25 This book is a study of communities that drew their identity and livelihood from their relationships with water during a pivotal time in the creation of the social economic and political landscapes of northern Europe. It focuses on the Baltic North and Irish Seas in the Viking Age ad 1050-1200 with a few later examples such as the Scottish Lordship of the Isles included to help illuminate less well documented earlier centuries. Individual chapters introduce maritime worlds ranging from the Isle of Man to Gotland while also touching on the relationships between estate centres, towns, landing places and the sea in the more terrestrially oriented societies that surrounded northern Europe's main spheres of maritime interaction. It is predominately an archaeological project but draws no arbitrary lines between the fields of historical archaeology, history and literature. The volume explores the complex relationships between long range interconnections and distinctive regional identities that are characteristic of maritime societies seeking to understand communities that were brought into being by their relationships with the sea and who set waves in motion that altered distant shores.
