different levels and institutions It has unnecessarily consumed many young lives contributed to keep billions in poverty until today and fostered discrimination of women The knowledge gap and the confusion in the sector lined out in the book becomes evident when a national leader in a low income country declares a state of emergency in urban water and sanitation while at the same time global monitoring publishes an access figure for urban water of over 90% for the same country It is time to change this with an effective sector development concept for our partner countries and a more realistic discourse on global level The book argues for a sweeping rethinking and combines extended local knowledge lessons learned from history in advanced countries and thorough research on reforms in Francophone and Anglophone developing countries This was possible because the writer was working in Sub Saharan partner countries for almost 30 years as an integrated long term advisor in different sector institutions ministry regulator financing basket and different sizes of utilities and had the opportunity to cooperate closely with the main development partners The reader has the opportunity to obtain a comprehensive understanding of how the sector works and sector institutions in low income countries function and can discover the reasons behind success and failures of reforms The book also covers issues which have a significant influence on urban water and sanitation development but are hardly the subject of discussions It helps to make the shortcomings of the water and sanitation discourse more apparent and assist institutions to move beyond their present perceptions and agendas All of this makes the book different from other literature about urban water and sanitation in the developing world Peers Inc Robin Chase,2015-06-09 When Robin Chase cofounded Zipcar she not only started a business but established the foundation for one of the most important economic and social ideas of our time the collaborative economy With this important book she broadens our thinking about the ways in which the economy is being transformed and shows how the Peers Inc model is changing the very nature of capitalism When the best of people power is combined with the best of corporate power to form Peers Inc organizations a potent creative force is released The Inc in these collaborations delivers the industrial strengths of significant scale and resources and the Peers bring together the individual strengths of localization specialization and customization unlocking the power of the collaborative economy When excess capacity is harnessed by the platform and diverse peers participate a completely new dynamic is unleashed In Peers Inc Robin Chase brings her provocative insights to work business the economy and the environment showing How focusing on excess capacity transforms the economics of what s possible and delivers abundance to all How the new collaboration between the Inc and the Peers enables companies to grow more quickly learn faster and deliver smarter products and services How leveraging the Peers Inc model can address climate change with the necessary speed and scale How the Peers Inc model can help legacy companies overcome their shortening life cycle by inviting innovation and evolution Why power parity between the Peers and the Inc is a prerequisite for long term success How platforms can be built within the existing financial system or outside of it What government can do to enhance economic possibility and protect people working in this new decentralized

world Chase casts a wide net illuminating the potential of the Peers Inc model to address broader issues such as climate change and income inequality and proves the impact that this innovative economic force can have on the most pressing issues of our time Product and Process Design Principles Warren D. Seider, Daniel R. Lewin, J. D. Seader, Soemantri Widagdo, Rafiqul Gani, Ka Ming Ng, 2016-05-17 The new 4th edition of Seider's Product and Process Design Principles Synthesis Analysis and Design covers content for process design courses in the chemical engineering curriculum showing how process design and product design are inter linked and why studying the two is important for modern applications A principal objective of this new edition is to describe modern strategies for the design of chemical products and processes with an emphasis on a systematic approach This fourth edition presents two parallel tracks 1 product design and 2 process design with an emphasis on process design Process design instructors can show easily how product designs lead to new chemical processes Alternatively product design can be taught in a separate course subsequent to the process design course
