the trivium which organizes learning around the maturing capacity of the child's mind and comprises three stages: the elementary school grammar stage when the building blocks of information are absorbed through memorization and rules; the middle school logic stage in which the student begins to think more analytically; and the high school rhetoric stage where the student learns to write and speak with force and originality. Using this theory as your model, you'll be able to instruct your child whether full time or as a supplement to classroom education in all levels of reading, writing, history, geography, mathematics, science, foreign languages, rhetoric, logic, art, and music regardless of your own aptitude in those subjects. Thousands of parents and teachers have already used the detailed book lists and methods described in *The Well Trained Mind* to create a truly superior education for the children in their care. This extensively revised fourth edition contains completely updated curricula and book lists, links to an entirely new set of online resources, new material on teaching children with learning challenges, cutting edge math and sciences recommendations, answers to common questions about home education, and advice on practical matters such as standardized testing, working with your local school board, designing a high school program, preparing transcripts, and applying to colleges. You do have control over what and how your child learns. *The Well Trained Mind* will give you the tools you'll need to teach your child with confidence and success.
