Automation and Autonomy James Steinhoff, 2021-06-21 This book argues that Marxist theory is essential for understanding the contemporary industrialization of the form of artificial intelligence AI called machine learning It includes a political economic history of AI tracking how it went from a fringe research interest for a handful of scientists in the 1950s to a centerpiece of cybernetic capital fifty years later It also includes a political economic study of the scale scope and dynamics of the contemporary AI industry as well as a labour process analysis of commercial machine learning software production based on interviews with workers and management in AI companies around the world ranging from tiny startups to giant technology firms On the basis of this

study Steinhoff develops a Marxist analysis to argue that the popular theory of immaterial labour which holds that information technologies increase the autonomy of workers from capital tending towards a post capitalist economy does not adequately describe the situation of high tech digital labour today In the AI industry digital labour remains firmly under the control of capital Steinhoff argues that theories discerning therein an emergent autonomy of labour are in fact witnessing labour s increasing automation

Humanizing Human Capital Solange Charas, PhD, Stela Lupushor, 2022-09-13 The work world is changing faster than ever before Adapting to this new reality without a significant interruption in results is increasingly a top priority for all businesses The key to thriving through disruption is understanding and practicing human capital strategies that will drive enterprise performance and value creation In *Humanizing Human Capital* renowned business thought leaders Solange Charas PhD and Stela Lupushor reframe traditional HR practices into a future forward strategy to optimize human capital Charas and Lupushor shift decision making about people from a gut sense to an evidence based approach a critical and much needed departure from the cross your fingers and hope for the best approach of most traditional HR programs today *Humanizing Human Capital* reveals a step by step method to apply analytics approaches to human capital while anticipating inevitable changes in the workforce landscape This will enable human capital professionals to generate positive outcomes for all stakeholders and allow management to make decisions that work for the entire enterprise With this book s comparison of traditional with the future forward approach to human capital management case studies real world situations and 20 business principles you will learn to Adopt a best evidence versus best practice approach to decision making Shift your thinking so that you view human capital as a crucial investment rather than as a sunk cost Identify what needs to change to respond to future pressures and apply critical thinking to create workable solutions Balance human capital analytics with the more human centric elements of people management Equip yourself with approaches and tools to interpret the collective voice of the workforce Utilize methods to measure and optimize human capital efficiency increasing your ROI Increase value for all key stakeholders including investors management workers customers partners and the community at large The road ahead may seem unpredictable and even treacherous but *Humanizing Human Capital* provides leaders of any organization a new framework to create resilient responsive and innovative organizations with tangible and sustainable business results
