The Routledge Handbook of English Language Education in the Philippines Julius C. Martinez, Isabel Pefianco Martin, 2025-09-30 This handbook serves as a comprehensive resource on English language education in the Philippines addressing a wide range of issues including ideologies multilingualism identities policies methodologies assessment teacher education and curriculum Chapters cover a range of educational contexts from Luzon to Mindanao islands from basic to higher education and from formal to non formal schooling This book upholds the think and do otherwise perspective by problematizing contemporary paradigms and practices that operate from naturalized ideas inherited from the American colonizers This includes repairing pedagogies that redress injustices experienced by historically marginalized groups and hoping for possibilities and approaches to teaching and learning English that are just equitable and inclusive The six sections in the Handbook bring up conditions for thinking and doing otherwise pointing to ways in which genuine changes can start to happen Scholars from diverse backgrounds come together in this handbook to take collective ownership of English language education in the Philippines This ownership

does not mean ignoring and disposing of the country's colonial past but reclaiming English language education as an ongoing project instead. This handbook likewise demonstrates that such a project makes it possible for wider audiences to see that Global South scholars from and in the Philippines also have much to teach the rest of the world about thinking and doing otherwise and by extension problematizing, repairing, and hoping. Given its scope and breadth, the handbook is an invaluable reference for students pre-service and in-service, teachers, teacher educators, researchers, and policymakers interested in English language education, TESOL, sociolinguistics, and applied linguistics.

Reston, 2023-07-21. This book is derived from selected papers from the Fourteenth International Congress on Mathematical Education Topic Study Group 12 Teaching and Learning Statistics. It describes recent research on curriculum, pedagogy, and outreach initiatives from countries as diverse as Brazil, Chile, Colombia, Denmark, Germany, the Netherlands, Spain, Sweden, Thailand, Turkey, the United Kingdom, and the United States. The book has a focus on the use of data in the teaching and learning of statistics across grade levels and begins with an overview of the status of statistics education and the use of data from seven different countries across the continents and the link between research and practice in those countries. Because it contains specific examples of the research, for example, on the ways children learn the choice and implementation of tasks or the role of informal inference, the book will be a great resource to those interested and involved in the teaching of statistics, curriculum developers, and statistics education researchers. *EducNews*, 2013.
