Cartographies Of Danger Mapping Hazards In America:

Cartographies of Danger Mark Monmonier, 2008-04-15 No place is perfectly safe but some places are more dangerous than others Whether we live on a floodplain or in Tornado Alley near a nuclear facility or in a neighborhood poorly lit at night we all co exist uneasily with natural and man made hazards As Mark Monmonier shows in this entertaining and immensely informative book maps can tell us a lot about where we can anticipate certain hazards but they can also be dangerously misleading California for example takes earthquakes seriously with a comprehensive program of seismic mapping whereas Washington has been comparatively lax about earthquakes in Puget Sound But as the Northridge earthquake in January 1994 demonstrated all too clearly to Californians even reliable seismic hazard maps can deceive anyone who misinterprets known fault lines as the only places vulnerable to earthquakes Important as it is to predict and prepare for catastrophic natural hazards more subtle and persistent phenomena such as pollution and crime also pose serious dangers that we have to cope with on a daily basis Hazard zone maps highlight these more insidious hazards and raise awareness about them among planners local officials and the public With the help of many maps illustrating examples from all corners of the United States Monmonier demonstrates how hazard mapping reflects not just scientific understanding of hazards but also perceptions of risk and how risk can be reduced Whether you live on a faultline or a coastline near a toxic waste dump or an EMF

generating power line you ignore this book's plain language advice on geographic hazards and how to avoid them at your own peril **Imagining Illness** David Serlin, 2010 Analyzing the visual culture of public health from the nineteenth century to the present **The Geographical Dimensions of Terrorism** Susan L. Cutter, Douglas B. Richardson, Thomas J.

Wilbanks, 2014-02-04 Undertaken as part of the National Science Foundation's call for research associated with the 9 11 terrorist attacks this volume contains research that addresses the immediate role and utility of geographical information and technologies in emergency management It also initiates an on going process to help develop a focused national research agenda on the geographical dimensions of terrorism Areas covered include geospatial data and technologies infrastructure research root causes of terrorism and vulnerability science and hazard research **Air Apparent** Mark

Monmonier, 2019-01-18 Weather maps have made our atmosphere visible understandable and at least moderately predictable In **Air Apparent** Mark Monmonier traces debates among scientists eager to unravel the enigma of storms and global change explains strategies for mapping the upper atmosphere and forecasting disaster and discusses efforts to detect and control air pollution Fascinating in its scope and detail **Air Apparent** makes us take a second look at the weather map an image that has been and continues to be central to our daily lives Clever title rewarding book Monmonier offers here a basic course in meteorology which he presents gracefully by means of a history of weather maps Scientific American Mark Monmonier is onto a winner with **Air Apparent** It is good accessible science and excellent history Read it Fred Pearce New Scientist **Air Apparent** is a superb first reading for any backyard novice of weather but even the veteran forecaster or researcher will find

it engaging and in some cases enlightening Joe Venuti Bulletin of the American Meteorological Society Monmonier is solid enough in his discussion of geographic and meteorological information to satisfy the experienced weather watcher But even if this information were not presented in such a lively and engaging manner it would still hook most any reader who checks the weather map every morning or who sits happily entranced through a full cycle of forecasts on the Weather Channel

Michael Kennedy Boston Globe *Geography and Technology* Stanley D. Brunn, Susan L. Cutter, James W.

Harrington, 2004-03-31 This volume celebrates the 100th anniversary of the Association of American Geographers It recognizes the importance of technologies in the production of geographical knowledge The original chapters presented here examine technologies that have affected geography as a discipline Among the technologies discussed are cartography the camera aerial photography computers and other computer related tools The contributors address the impact of such technologies on geography and society disciplinary inquiries into the social technological interfaces high tech as well low tech societies and applications of technologies to the public and private sectors Geography and Technology can be used as a textbook in geography courses and seminars investigating specific technologies and the impacts of technologies on society and policy It will also be useful for those in the humanities social policy and engineering sciences planning and development fields where technology questions are becoming of increased importance Geography clearly has much to learn from other disciplines and fields about geography technology linkages others can likewise learn much from us *How to Lie with Maps*

Mark Monmonier, 2018-04-13 An updated edition of the humorous informative and perceptive guide to how maps can lead us astray Toronto Globe and Mail An instant classic when first published in 1991 How to Lie with Maps revealed how the choices mapmakers make consciously or unconsciously mean that every map inevitably presents only one of many possible stories about the places it depicts The principles Mark Monmonier outlined back then remain true today despite significant technological changes in the making and use of maps The introduction and spread of digital maps and mapping software however have added new wrinkles to the ever evolving landscape of modern mapmaking Fully updated for the digital age this new edition of How to Lie with Maps examines the myriad ways that technology offers new opportunities for cartographic mischief deception and propaganda While retaining the same brevity range and humor as its predecessors this third edition includes significant updates throughout as well as new chapters on image maps prohibitive cartography and online maps It also includes an expanded section of color images and an updated list of sources for further reading Praise for previous editions of How to Lie with Maps Will leave you much better defended against cheap atlases shoddy journalism unscrupulous advertisers predatory special interest groups and others who may use or abuse maps at your expense Christian Science Monitor *Technical Communication for Environmental Action* Sean D. Williams, 2023-01-01 Climate change is one of the most significant challenges facing the global community in the twenty first century With its position at the border of people technology science and communication technical communication has a significant role to play in helping to solve these

complex environmental problems This collection of essays engages scholars and practitioners in a conversation about how the field has contributed to pragmatic and democratic action to address climate change Compared to most prior work which offers theoretical perspectives of environmental communication this collection explores the actual practice of international technical communicators who participate in government projects corporate processes nonprofit programs and international agency work demonstrating how technical communication theories such as participatory design social justice and ethics can help shape pragmatic environmental action br SUNY Press has collaborated with Knowledge Unlatched to unlock KU Focus Collection titles The Knowledge Unlatched titles have been made open access through libraries coming together to crowd fund the publication cost Each monograph has been released as open access making the eBook freely available to readers worldwide Discover more about the Knowledge Unlatched program here <https://www.knowledgeunlatched.org> It can also be found in the SUNY Open Access Repository at <https://soar.suny.edu/handle/20.500.12648/8482>

Encyclopedia of Geography Barney Warf, 2010-09-21 Simply stated geography studies the locations of things and the explanations that underlie spatial distributions Profound forces at work throughout the world have made geographical knowledge increasingly important for understanding numerous human dilemmas and our capacities to address them With more than 1 200 entries the Encyclopedia of Geography reflects how the growth of geography has propelled a demand for intermediaries between the abstract language of academia and the ordinary language of everyday life The six volumes of this encyclopedia encapsulate a diverse array of topics to offer a comprehensive and useful summary of the state of the discipline in the early 21st century

Key Features Gives a concise historical sketch of geography's long rich and fascinating history including human geography physical geography and GIS Provides succinct summaries of trends such as globalization environmental destruction new geospatial technologies and cyberspace Decomposes geography into the six broad subject areas physical geography human geography nature and society methods models and GIS history of geography and geographer biographies geographic organizations and important social movements Provides hundreds of color illustrations and images that lend depth and realism to the text Includes a special map section

Key Themes Physical Geography Human Geography Nature and Society Methods Models and GIS People Organizations and Movements History of Geography This encyclopedia strategically reflects the enormous diversity of the discipline the multiple meanings of space itself and the diverse views of geographers It brings together the diversity of geographical knowledge making it an invaluable resource for any academic library

A History of Spaces John Pickles, 2012-11-12 This book provides an essential insight into the practices and ideas of maps and map making It draws on a wide range of social theorists and theorists of maps and cartography to show how maps and map making have shaped the spaces in which we live Going beyond the focus of traditional cartography the book draws on examples of the use of maps from the sixteenth century to the present including their role in projects of the national and colonial state emergent capitalism and the planetary consciousness of the natural sciences It also considers the use of maps for military purposes

maps that have coded modern conceptions of health disease and social character and maps of the transparent human body and the transparent earth *#Help* Fleur Johns, 2023 Like many other areas of life humanitarian practice and thinking are being transformed by information and communications technology Yet the growing digitization of humanitarianism has so far been a relatively little noticed dimension of global order It is one on which this book sheds new light Based on more than seven years of interviews and interdisciplinary research on humanitarian and development professionals work within the UN system and elsewhere *Help* shows how global problems and politics are being newly configured regulated and addressed through digital interfaces developed or deployed for humanitarian ends *Help* analyzes how populations maps and emergencies take shape on the global plane when given digital form *Help* explores the reorientation of nation states priorities and practices of governing around digital data collection imperatives *Help* illuminates how digital interfaces growing prominence in international humanitarian work is sustained and shaped by law and policy public and private and the uses and users that are engaged and disqualified in the process Through this *Help* reveals new vectors of global inequality and new registers of global relation taking effect in the here and now To understand how major digital platforms are seeking to extend their serviceable lives and to foreshadow how global order might take shape in the future it is essential to grasp the perils and possibilities of digital humanitarianism as *Help* equips us to do *Help* will transform thinking about what is at stake in the use of digital interfaces in the humanitarian field and about how where and for whom we are making the global order of tomorrow
