Die Peripheren Ein Kapitel Soziologie:

Die Peripheren Ernst Grünfeld, 2015 **Historicism** Herman Paul, Adriaan van Veldhuizen, 2020-10-15 Throughout the twentieth century scholars artists and politicians have accused each other of historicism But what exactly did this mean Judging by existing scholarship the answers varied enormously Like many other isms historicism could mean nearly everything to the point of becoming meaningless Yet the questions remain What made generations of scholars throughout the humanities and social sciences worry about historicism Why did even musicians and members of parliament warn against historicism And what explains this remarkable career of the term across generations fields regions and languages Focusing on the travels that historicism made this volume uses historicism as a prism for exploring connections between disciplines and intellectual traditions usually studied in isolation from each other It shows how generations of sociologists theologians and historians tried to avoid pitfalls associated with historicism and explains why the term was heavily charged with emotions like anxiety anger and worry While offering fresh interpretations of classic authors such as Friedrich Meinecke Karl L with and Leo Strauss this volume highlights how historicism took on new meanings connotations and emotional baggage in the course of its travels through time and place *Logic's Lost Genius* Eckart Menzler-Trott, 2016-05-05 Gerhard Gentzen 1909 1945 is the founder of modern structural proof theory His lasting methods rules and structures resulted not only in the technical mathematical discipline called proof theory but also in verification programs that are essential in computer science The appearance clarity and elegance of Gentzen's work on natural deduction the sequent calculus and ordinal proof theory continue to be impressive even today The present book gives the first comprehensive detailed accurate scientific biography expounding the life and work of Gerhard Gentzen one of our greatest logicians until his arrest and death in Prague in 1945 Particular emphasis in the book is put on the conditions of scientific research in this case mathematical logic in National Socialist Germany the ideological fight for German logic and their mutual protagonists Numerous hitherto unpublished sources family documents archival material interviews and letters as well as Gentzen's lectures for the mathematical public make this book an indispensable source of information on this important mathematician his work and his time The volume is completed by two deep substantial essays by Jan von Plato and Craig Smoryski on Gentzen's proof theory its relation to the ideas of Hilbert Brouwer Weyl and Gödel and its development up to the present day Smoryski explains the Hilbert program in more than the usual slogan form and shows why consistency is important Von Plato shows in detail the benefits of Gentzen's program This important book is a self contained starting point for any work on Gentzen and his logic The book is accessible to a wide audience with different backgrounds and is suitable for general readers researchers students and teachers The Reportage of Urban Culture Rolf Lindner, 1996-07-11 The current fascination with urban life has encouraged a growing interest in the Chicago School of sociology by students of sociological history It is generally accepted that the field research practised by the Chicago sociologists during the 1920s the Golden Age of Chicago sociology used methods borrowed from

anthropology However Rolf Lindner also argues convincingly that the orientation of urban research advocated by Robert Park the key figure in the Chicago School and himself a former reporter is ultimately indebted to the tradition of urban reportage The Reportage of Urban Culture goes beyond a thorough reconstruction of the relationship between journalism and sociology It shows how the figure of the city reporter at the turn of the century represents a new way of looking at life and reflects a transformation in American culture from rejecting variety to embracing it Sociologus Richard Thrunwald,1928 Includes section Besprechungen und berichte **Handbuch Kulturosoziologie** Stephan Moebius,Frithjof Nungesser,Katharina Scherke,2019-04-29 Die Vielfalt kulturosoziologischer Ans tze Diskurse Arbeitsfelder und Methoden wird in diesem Handbuch kompakt dargestellt Geboten wird damit die M glichkeit zur Orientierung innerhalb des heterogenen Feldes der Kulturosoziologie Unterschiedliche Positionen und das mit ihnen jeweils verbundene Verst ndnis von Kultur werden sichtbar gemacht und die Leser_innen zur weiterf hrenden Auseinandersetzung mit diesem Forschungsfeld eingeladen Band 1 des Handbuchs widmet sich dem Begriff der Kultur der Kontextualisierung des Themenfeldes Kulturosoziologie im interdisziplin ren Umfeld seiner Entwicklung und gegenw rtigen Ausformung in unterschiedlichen Weltregionen sowie zentralen kulturosoziologischen Autor_innen Das Charisma des Gekreuzigten Michael N. Dalenoort,2012-12-06 In our daily lives we conceive of our surroundings as an objectively given reality The world is perceived through our senses and hese provide us so we believe with a faithful image of the world But occ ipnally we are forced to realize that our senses deceive us e g by illusions For a while it was believed that the sensation of color is directly r lated to the frequency of light waves until E Land the inventor of the polaroid camera showed in detailed experiments that our perception of say a colored spot depends on the colors of its surrounding On the other hand we may experience hallucinations or dreams as real Quite evidently the relationship between the world and our brain is intricate Another strange problem is the way in which we perceive time or the Now Psychophysical experiments tell us that the psychological Now is an extended period of time in the sense of physics The situation was made still more puzzling when in the nineteen twenties Heisenberg and others realized that by observing processes in the microscopic world of electrons and other elementary particles we strongly interfere with

that world The outcome of experiments at least in general can only be predicted statistically What is the nature of this strange relationship between object and observer This is another crucial problem of the inside outside or endo exo dichotomy
