Coffee Brewing Handbook:

The Coffee Brewing Handbook Ted R. Lingle, Specialty Coffee Association of America, 1996-01-01 The Art and Craft of Coffee Kevin Sinnott, 2011-01-19 Sinnott's guide to primo coffee enables readers to fill their cups to the rim with greatness. It will result in a better cup of joe. Publishers Weekly starred review. There is no other beverage that gives you a better way to travel the world than coffee. You can literally taste the volcanic lava from Sumatra, smell the spice fields of India, and lift your spirits to the Colombian mountaintops in your morning cup of joe. The Art and Craft of Coffee shows you how to get the most out of your coffee from fresh roasted bean to hand crafted brew. In The Art and Craft of Coffee, Kevin Sinnott, the coffee world's most ardent consumer advocate, educates, inspires, and caffeinates you. Inside you will find: How green coffee beans are farmed and harvested; Insight into single origin coffee beans and worldwide coffee harvests; A photo guide to roasting your own coffee at home; How to choose the best grinder for your beans; A complete visual manual for 9 coffee brewing styles including French press, vacuum, Chemex, auto drip, Turkish ibrik, and espresso; Delicious recipes for dozens of coffee and espresso beverages. In the decades that Kevin Sinnott has spent meeting with and interviewing hundreds of coffee professionals rather than crossing over to the dark side and becoming one himself, he has taken what he has learned and translated it from coffee geek speak into English. Why? For the sole purpose of allowing you to better enjoy your coffee. In short, if you like coffee, you will love this book. Oren Bloostein, proprietor of Oren's Daily Roast.

The Water Quality Handbook David Beeman, Paul Songer, Ted Lingle, 2011-08-16 When coffee professionals discuss the process of brewing coffee, the merits of certain key variables—bean, roast, grind, brew temperature, and brewer—are always touched upon. Unfortunately, one of the most important variables, water, is often left out of that discussion. Given that a cup of coffee is made up of 98.5% of water and typically 95% of the espresso beverage, it is important to understand that water is an essential variable, and the quality of this variable is even more important. Water used for brewing coffee must meet the high standards required for proper extraction of the flavors and aromas inherent in a Golden Cup, the Specialty Coffee Association of America's certification of high quality freshly brewed coffee.
