Bilingualism and Social Relations J. Normann Jørgensen, 2003-01-01 Studies of the multilingual practices of Turkish speaking adolescents in North Western Europe The speakers use their different languages for a wide range of purposes getting their way creating a comfortable atmosphere saving face being polite showing respect showing disrespect scolding and in many other ways to administer their social relations The skills demonstrated by the young

speakers are almost never taken into account by the majority societies *Language in Cape Town's District Six* Kay McCormick, 2002 The book is a sociolinguistic case study of District Six an inner city neighbourhood in Cape Town characterized by language mixing and switching of English and Afrikaans Its early inhabitants included indigenous people freed slaves of African and Asian origin and immigrants from Europe and elsewhere The ravages of apartheid affected the residents attitudes towards their languages in various ways which are described The book examines the norms and practices regarding language choice for various functions and domains in the only surviving sector of District Six It also contains detailed analyses of extended bilingual conversations showing a range of social linguistic and discourse features Of particular interest is the paradoxical polarization and blending of the two languages They are strongly polarized symbolically and functionally yet they are also habitually blended in vernacular speech through lexical borrowing and intrasentential language switching This paradox has interesting implications for the construction of individual community and language identity Language Mixing and Code-Switching in Writing Mark Sebba, Shahrzad Mahootian, Carla Jonsson, 2012-05-22 Code switching or the alternation of languages by bilinguals has attracted an enormous amount of attention from researchers However most research has focused on spoken language and the resultant theoretical frameworks have been based on spoken code switching This volume presents a collection of new work on the alternation of languages in written form Written language alternation has existed since ancient times It is present today in a great deal of traditional media and also exists in newer less regulated forms such as email SMS messages and blogs Chapters in this volume cover both historical and contemporary language mixing practices in a large range of language pairs and multilingual communities The research collected here explores diverse approaches including corpus linguistics Critical Discourse Analysis literacy studies ethnography and analyses of the visual textual aspects of written data Each chapter based on empirical research of multilingual writing presents methodological approaches as models for other researchers New perspectives developed in this book include analysis specific to written rather than spoken discourse approaches from the new literacy studies treating mixed language literacy from a practice perspective a focus on both traditional and new media types and the semiotics of both text and the visual environment *Language Policy Beyond the State* Maarja Siiner, Kadri Koreinik, Kara D. Brown, 2017-05-04 Language Policy beyond the State invites readers to reconsider the ways language policy is constituted taken up and researched if we look within and past the state Contributors to this edited volume draw attention to language policy as always in the making focusing on agency on the ground practices and ideologies The chapters of the book reveal how simultaneous and at times contradicting language policies exist within a state and explore the complex roles played by families businesses educational institutions and media in generating and appropriating these policies By moving away from language policy analysis concerned primarily with how official state policies address well defined language problems some of the contributions of the volume highlight how the problems themselves can be ideological artifacts or are discursively

constructed in language ideological debates that are provoked by changes in the geopolitical situation in the region Using qualitative and descriptive research the book uses Estonia as a setting to examine the ways historic and contemporary populations navigate language policies in both local and transnational spaces As a whole the collection speaks eloquently and powerfully to current efforts to understand and map the ways multiple institutions and individuals not just the state play an active role in forming and taking up language policies

Code-switching Between Structural and Sociolinguistic Perspectives Gerald Stell, Kofi Yakpo, 2015-02-17 The study of code switching has been carried out from linguistic psycholinguistic and sociolinguistic perspectives largely in isolation from each other This volume attempts to unite these three research strands by placing at the centre of the enquiry the role played by social factors in the occurrence forms and outcomes of code switching The contributions in this volume are divided into three parts code switching between cognition and socio pragmatics multilingual interaction and identity and code switching and social structure The case studies represent contact settings on five continents and feature languages with diverse linguistic affiliations They are predictive and descriptive in their research goals and rely on experimental or naturalistic data But they share the common goal of seeking to explain how social structures ideologies and identity impact on the grammatical and conversational features of code switching and language mixing and on the emergence of mixed languages Given its scope this volume is a significant addition to the empirical and theoretical foundations of the study of code switching It is also of relevance to the general debate on the inter relationships between language and society
