Computational Intelligence in Biomedical Engineering Rezaul Begg,Daniel T.H. Lai,Marimuthu Palaniswami,2007-12-04 As in many other fields biomedical engineers benefit from the use of computational intelligence CI tools to solve complex and non linear problems The benefits could be even greater if there were scientific literature that specifically focused on the biomedical applications of computational intelligence techniques The first comprehensive field *Randomized Algorithms in Automatic Control and Data Mining* Oleg Granichin,Zeev (Vladimir) Volkovich,Dvora Toledano-Kitai,2014-07-14 In the fields of data mining and control the huge amount of unstructured data and the presence of uncertainty in system descriptions have always been critical issues The book *Randomized Algorithms in Automatic Control and Data Mining* introduces the readers to the fundamentals of randomized algorithm applications in data mining especially clustering and in automatic control synthesis The methods proposed in this book guarantee that the computational complexity of classical algorithms and the conservativeness of standard robust control techniques will be reduced It is shown that when a problem requires brute force in selecting among options algorithms based on random selection of alternatives offer good results with certain probability for a restricted time and significantly reduce the volume of operations
