Computer Assisted Assessment Of Students Seda Series:

Computer-assisted Assessment of Students Sally Brown, Joanna Bull, Phil Race, 2013-04-03 This text draws on a range of expertise to share good practice and explore new ways of using appropriate technologies in assessment It provides a strategic overview along with pragmatic proposals for the use of computers in assessment **Inspiring Students** Kemel (Principle Teaching Fellow Ahmet, 2013-09-13 This text looks at the problems of teaching HE students whose main interest and discipline lies elsewhere Contributors describe strategies they have developed to inspire students and case studies are used to transfer key ideas to other teachers *Understanding Undergraduates* Celia Popovic, David A. Green, 2012-08-06 Most university teachers have ideas about the typical good or not so good student in their classes but rarely do they share these thoughts with others By keeping quiet about the preconceptions or stereotypes they harbour teachers put themselves at risk of missing key evidence to help them revise their beliefs more importantly they may fail to notice students in real need of their support and encouragement In this unique work the authors explore UK and US university teachers beliefs about their students performance and reveal which beliefs are well founded which are mistaken which mask other underlying factors and what they can do about them So is it true for instance that British Asian students find medicine more difficult than their white counterparts or that American students with sports scholarships take their studies less seriously Is it the case that students who sit at the front of the lecture hall get better grades than those who sit at the back By comparing students demographic data and their actual performance with their teachers expectations the authors expose a complex picture of multiple factors affecting performance They also contrast students comments about their own study habits with their views on what makes a good learner For each preconception they offer clear advice on how university teachers can redesign their courses introduce new activities and assignments and communicate effective learning strategies that students will be able to put into practice Finally the authors explore the ramifications of teachers beliefs and suggest actions that can be taken at the level of the institution department or programme and in educational development events designed to level the playing field so that students have a more equitable chance of success Ideal for both educational developers and university teachers this book reveals general tendencies and findings that will inform developers own work with university teachers provides practical guidance and solutions for university teachers to be able to identify and address students actual rather than assumed needs explores means of addressing and challenging people s natural tendency to rely on preconceived ideas and stereotypes and explains an action research method that educational developers can use on their own campuses to unravel some of the local preconceptions that may be hampering student success Motivating Students Steve Armstrong, Sally Brown, Gail Thompson, 2014-05-22 This work brings together the experience of educators trainers and students searching for ways of increasing student motivation Links between motivation and training learning and assessment processes are examined through case studies set in a broad range of subject discipline contexts Handbook of Research on

ePortfolios Jafari, Ali, Kaufman, Catherine, 2006-05-31 This handbook investigates a variety of ePortfolio uses through case studies the technology that supports the case studies and it also explains the conceptual thinking behind current uses as well as potential uses Provided by publisher *Reshaping Teaching in Higher Education* Rosanna Breen, Angela Brew, Alan Jenkins, Roger Lindsay, 2003-12-16 Linking research with teaching is one of the main topics in the educational development world This practice based guide shows how academic research activity can be connected to academic teaching activity to ensure that neither operates in a vacuum and each can be enhanced by the other Addressing issues at the individual course and institutional level and written for an international readership this will be a key book for course leaders and educational developers *Quality Issues in ICT-based Higher Education* Stephen J. Fallows, Rakesh Bhanot, 2005 This text provides advice on how to ensure educational quality is maintained when ICT approaches are successfully adopted It includes contributions from authors around the world who scrutinize the implications for using institution wide ICT in teaching strategy **Educational Development Through Information and Communications Technology** Rakesh Bhanot, Stephen Fallows, 2003-12-16 Published in the Staff and Educational Development Series and bringing together contributions from a range of higher educational settings in the UK and Internationally this book explores the practical use that can be made of IT by educators **500 Tips on Assessment** Philip Race, Sally Brown, Brenda Smith, 2005 An invaluable dip in aid for hard pressed lecturers and teachers in further and higher education It should be read enjoyed and seriously considered by all those concerned about the quality and appropriateness of their assessment methods ECEL2012-The Proceedings of the 11th European Conference on E-Learning Hans Beldhuis, 2012
