Roscoe,2018-03-13 The Promise of Democratic Equality in the United States explores the ways in which the American political system fails to fully respect political equality Douglas D Roscoe argues these deficiencies are not necessarily failures of justice but often reflect attempts to balance important but competing principles and values He analyzes the balance among these competing values in a variety of contexts including congressional representation the Electoral College voting regulations campaign finance lobbying the Senate filibuster rules and protections for civil rights and liberties A diverse set of methodological approaches is employed to carefully evaluate whether the limits placed on political equality are reasonable and necessary Using a rigorous normative framework while leaning heavily on high quality quantitative evidence and social science research this book provides students of democratic theory and American politics with a compact and manageable review of the degree to which democratic equality is supported in the United States *Democratic Experiments in Africa* Michael Bratton,Nicolas Van de Walle,1997-08-13 Appendix The Data Set *Evolution and Progress in Democracies* Johann Götschl,2013-03-09 In a ground breaking series of articles one of them written by a Nobel Laureate this volume demonstrates the evolutionary dynamic and the transformation of today s democratic societies into scientific democratic societies It highlights the progress of modeling individual and societal evaluation by neo Bayesian utility theory It shows how social learning and collective opinion formation work and how democracies cope with randomness caused by randomizers Nonlinear evolution equations and serial stochastic matrices of evolutionary game theory allow us to optimally compute possible serial evolutionary solutions of societal conflicts But in democracies progress can be defined as any positive gradual innovative and creative change of culturally used transmitted and stored mentifacts models theories sociofacts customs opinions artifacts and technifacts within and across generations The most important changes are caused besides randomness by conflict solutions and their realizations by

citizens who follow democratic laws These laws correspond to the extended Pareto principle a supreme socioethical democratic rule According to this principle progress is any increase in the individual and collective welfare which is achieved during any evolutionary progress Central to evolutionary modeling is the criterion of the empirical realization of computed solutions Applied to serial conflict solutions decisions evolutionary trajectories are formed they become the most influential causal attractors of the channeling of societal evolution Democratic constitutions legal systems etc store all advantageous present and past adaptive competitive cooperative and collective solutions and their rules they have been accepted by majority votes Societal laws are codes of statutes default or statistical rules and they serve to optimally solve societal conflicts in analogy to game theoretical models or to statistical decision theory Such solutions become necessary when we face harmful or advantageous random events always lurking at the edge of societal and external chaos The evolutionary theory of societal evolution in democracies presents a new type of stochastic theory it is based on default rules and stresses realization The rules represent the change of our democracies into information science and technology based societies they will revolutionize social sciences especially economics Their methods have already found their way into neural brain physiology and research into intelligence In this book neural activity and the creativity of human thinking are no longer regarded as linear deductive Only evolutive nonlinear thinking can include multiple causal choices by many individuals and the risks of internal and external randomness this serves the increasing welfare of all individuals and society as a whole Evolution and Progress in Democracies is relevant for social scientists economists evolution theorists statisticians philosophers philosophers of science and interdisciplinary researchers
