Example question Consider the case of nine year old Rebecca who comes in to surgery with her parents This is her first dental visit She has been kept awake with a painful tooth Examination shows that she has several decayed teeth and that a lower right primary molar is causing the present pain Rebecca is crying and climbing out of the dental chair What is the best way to handle this situation Clinically Rebecca s case draws on various themes Without starting your undergraduate training you will not need to know about the clinical implications in detail However an understanding of the themes will make you stand out A common answer is to indicate that some dentists may consider writing a brief referral letter to the local hospital for this tooth to be extracted with a general anaesthetic The questions that you want to be thinking about clinically are Can this tooth be restored or does it need extraction What are the implications if I extract in the future orthodontically can it have consequences Does the patient need General Anaesthetic or can this be managed within practice under Local Anaesthetic Rebecca has other dental needs as stated and has never attended a dentists before how would I like to manage this to cause her the least upset All of the above would require consideration of who would be consenting for the patient In this case at 9 years old the patient would require a parent or legal guardian to consent for her Gillick Competence allows for a child up to the age of eighteen to make their own decision regarding their care However the dentist must carefully assess that all the criteria for valid consent detailed in question four are present There is particular emphasis placed on the patient s ability to understand and retain all the information given and communicate their reasoned decision Gillick Competence will be more relevant for scenarios where the child in question is slightly older The ethical and legal responsibility to respect children as well as those who support them is essential in establishing strong professional relationships In this particular situation explaining the options and offering choices will help the parents to make their decisions appropriately after understanding what s on offer which in turn will increase the likelihood of co operation whichever option is finally decided upon For Example The dentist should tell the family about the options and explain how the pain can be controlled with analgesics and a

simple dressing He she should explain that it may be wise to slowly introduce Rebecca to dental care so that she becomes familiar with the dental environment before starting treatment In this way he is enforcing the act of beneficence by acting in the patient s best interests and enabling the child s parents to make an informed decision thereby enabling autonomy Topics covered GENERAL POINTS TO CONSIDER TRADITIONAL INTERVIEWS AND MMIS SCIENCE QUESTIONS ETHICAL QUESTIONS ABOUT THE UNIVERSITY PERSONAL QUALITIES ABOUT YOU WORK EXPERIENCE AND EDUCATION DENTAL INDUSTRY DENTISTRY IN THE NHS CURRENT AFFAIRSWant to be tutored by the authors for your dentistry interview Book them now at medinterview.com **Getting into Dental School** Adam Cross (College vice-principal),2019-03-01 Covering every aspect of the application process from writing a winning personal statement to interview techniques and career prospects Getting into Dental School has all of the essential information would be dental students need to secure a place on the course of their choice **Practice Management for the Dental Team - E-Book** Betty Ladley Finkbeiner,Charles Allan Finkbeiner,2013-12-27 Learn the business skills you need to run a dental office Not only is Practice Management for the Dental Team the most comprehensive dental practice management book on the market it is also the only one that includes EagleSoft software exercises for a realistic office experience This unique text provides step by step instructions for performing essential dental office skills from managing patients to running the business It covers all aspects of law and ethics technology communications and business office systems Spiral binding makes the book easy to use All aspects of the business of managing a dental practice are covered focusing on the functions generally performed by the administrative assistant but including information useful to dental assistants dental hygienists and other members of the dental team A Patterson Dental EagleSoft CD ROM included with the workbook provides you with valuable realistic practice experience with this widely used software program Expert author Betty Ladley Finkbeiner is a leading authority in dental assisting education with many years of experience and many publications to her credit Key terms are bolded and defined at the end of each chapter putting new vocabulary at your fingertips Summary tables and boxes make it easy to find key information Practice Note boxes highlight and summarize important concepts Chapter outlines and objectives introduce material and serve as checkpoints for reference or study End of chapter learning activities include review questions and suggested activities for better comprehension of the material Useful appendixes provide easy to find resources including a review of grammar to promote proper business communication common medical abbreviations and a listing of dental terminology A NEW two column format makes the book more compact and easier to read A new focus on paperless technology and updated illustrations and photos of traditional paperwork keep you up to date with current practices Expanded coverage of information security includes the latest on keeping communications secure within the office environment Updated coverage of financial procedures includes information on electronic banking record keeping and tax forms Evolve resources for students include online access to EagleSoft practice exercises that use actual screen shots to
