Charley Harper, 2016-06 Charley Harper's artistic life was all about shape and color From his early days on a West Virginia farm through his career as a midcentury modernist Charley 1922-2007 understood the power of black lines in art He never owned or used a computer to draw Rather Charley maintained a collection of drafting tools familiar to the architect and the engineer compasses T squares and french curves with which he applied lines to paper via a ruling pen filled with india ink Even in his early eighties and challenged by osteoarthritis he could still draw straight lines and keep a steady width of ink flowing from the nib of his pen for a long distance I often watched amazed by the skill and confidence my father had achieved after some sixty years of practice Many of Charley's most complex images were created between the late 1970s and the beginning of this century Some pictured entire ecosystems rather than individual creatures or several creatures interacting These massive images especially the ten huge paintings commissioned by the National Park Service that required a year each to paint are marriages of clever design and stunning colors These images along with others created for national monuments nature centers birding centers zoos parks and an international bio preserve are sure to offer an escape into Charley's natural world With painstaking care the graphic designers at Pomegranate Communications have traced by hand the outlines of over fifty classic Charley Harper images Thus every complex image has been carefully extracted and redrawn from the original painting housed in the Harper studio archives Each flower beak wing leaf fin leg and head has been retrieved and prepared to provide you with many hours and days of enjoyable coloring If you wish follow the reproductions of Charley's actual full color images and employ them as your guide Or use creative license and make up your own color combinations I just want you to relax and have fun Happy coloring Brett Harper Son of Charley and Edie Harper

intriguing nature subjects Harper's love of painting and drawing led him from the hills of West Virginia to the bombed out villages of Europe to the streets of New York City and to the halls of the Art Academy of Cincinnati. He did it by counting the wings. *Count the Wings* is the first book for middle grade readers about Harper's life and work.
