Glossary of Chinese Medicine - E-Book Li Tian,Anton Lachner,2016-07-02 Anyone who learns the skills of acupuncture or who extends his knowledge of TCM is inevitably confronted with terms which hitherto had always meant something different to him or her Take the use of the word wind for example to refer to a pathogenic factor contributing to illnesses rather than its sense as a climatic factor This difficulty is compounded by the fact that in most books these terms are not used in a clear and uniform way One of the many examples is the Chinese term xu which is translated as insufficiency but also as deficiency or severity and is often not even used consistently within one and the same publication This glossary presents all the Chinese terms in Chinese characters and in Pinyin script that are relevant to TCM and provides their English translations It also provides an explanation of how for example the location or the function of an acupuncture point can be concluded from its name Teaches the reader to correctly pronounce important terms from TCM which are increasingly used in pinyin transcription The significance of TCM concepts provide explanations for the function of points and medications Written by leading experts in the field Attractive design throughout **A Guide to Chinese Medicine on the Internet** Ka Wai Fan,2008-10-30 A Guide to Chinese Medicine on the Internet frees readers from having to sift through countless websites to find up to date high quality reliable information on all types of Chinese medicine This handy resource provides an introduction to the terms and philosophies of Chinese medicine in addition to an extensive categorized listing of online sites related to Chinese culture and medicine complete with a brief description of each site s content Guidelines are provided for searching cataloging and evaluating websites concerned with Chinese medicine based on the author s research and personal experience as a practitioner and user of Chinese medicines A Brief History of Chinese Medicine Peng Yoke Ho,F. Peter Lisowski,1997 This brief discourse is an introduction to the historical development of medicine in China whose influence on Korea Japan and Southeast Asia was profound and even reached far west into the Islamic world The authors wish to make the

interested reader aware of China's rich contribution to the world growth of the medical sciences Too often the view has been taken that the history of medicine began with the discoveries of the Greeks and those ancient nations from whom they learnt The authors want to redress this view and acquaint readers with a glimpse of the concepts and history of Chinese medicine and hope that they will feel encouraged to delve deeper this volume is a compact tantalizing excursion through centuries of medical tradition in a range of cultures it does make a long complex and fascinating history accessible to medical professionals and students of Chinese history who may be tempted to delve further into this rich and interesting field

Breast Cancer in Women of African Descent Olufunmilayo I. Olopade, Carla I. Falkson, 2010-05-28 Although there are numerous technical scientific books on breast cancer in the global bibliography such books deal exclusively with the nature of the disease in majority populations of the Western societies with little or no reference to the nature of the disease in the minority populations in such societies Similarly the nature of breast cancer in black women of the less privileged societies and in women of ethnic groups living in countries of similar socio economic status is virtually unknown For various epidemiological reasons breast cancer incidence is rapidly increasing in these countries more so than currently is the case in developed countries Thus the global burden of cancer is shifting gradually to these areas of the world and may equal or even surpass the breast cancer burden in the Western societies within the foreseeable future This book is unique because it bucks the trend of virtually all other breast cancer books by addressing specifically the breast cancer experience of women of African descent and their lifestyle counterparts in other societies of the world
