Capital Cities In Africa Power And Powerlessness Paperback:

Capital Cities in Africa S. B. Bekker, Göran Therborn, 2012 Arises from a conference held in 2008 in Dakar Senegal hosted by the Council for the Development of Social Science Research in Africa CODESRIA *Cities of Power* Göran Therborn, 2021-10-12 Why are cities centers of power A sociological analysis of urban politics In this brilliant very original survey of the politics and meanings of urban landscapes leading sociologist Göran Therborn offers a tour of the world's major capital cities showing how they have been shaped by national popular and global forces Their stories begin with the emergence of various kinds of nation state each with its own special capital city problematic In turn radical shifts of power have impacted on these cities development in popular urban reforms or movements of protest and resistance in the rise and fall of fascism and military dictatorships and the coming and going of Communism Therborn also analyzes global moments of urban formation of historical globalized nationalism as well as the cities of current global image capitalism and their variations of skyscraping gating and displays of novelty Through a global historical lens and with a thematic range extending from the mutations of modernist architecture to the contemporary return of urban revolutions Therborn questions received assumptions about the source manifestations and reach of urban power combining perspectives on politics sociology urban planning architecture and urban iconography He argues that at a time when they seem to be moving apart there is a strong link between the city and the nation state and that the current globalization of cities is largely driven by the global aspirations of politicians as well as those of national and local capital With its unique systematic overview from Washington D C and revolutionary Paris to the flamboyant twenty first century capital Astana in Kazakhstan its wealth of urban observations from all the populated continents and its sharp and multi faceted analyses *Cities of Power* forces us to rethink our urban future as well as our historically shaped present *Refractions of the National, the Popular and the Global in African Cities* Simon Bekker, Sylvia Croese, 2021-02-26 Case studies of metropolitan cities in nine African countries from Egypt in the north to three in West and Central Africa two in East Africa and three in Southern Africa make up the empirical foundation of this publication The interrelated themes addressed in these chapters the national influence on urban development the popular dynamics that shape urban development and the global currents on urban development make up its framework All authors and editors are African as is the publisher The only exception is Göran Therborn whose recent book *Cities of Power* served as motivation for this volume Accordingly the issue common to all case studies is the often conflictual powers that are exercised by national global and popular forces in the development of these African cities Rather than locating the case studies in an exclusively African historical context the focus is on the trajectories of the postcolonial city with the important exception of Addis Ababa with a non colonial history that has granted it a special place in African consciousness These trajectories enable comparisons with those of postcolonial cities on other continents This in turn highlights the fact that Africa today the least urbanised continent on an increasingly urbanised globe is in the thick of

processes of large scale urban transformation illustrated in diverse ways by the case studies that make up the foundation of this publication

Short Description **The City as Power** Alexander C. Diener, Joshua Hagen, 2018-09-18 This interdisciplinary book considers national identity through the lens of urban spaces By bringing together scholars from a range of disciplines The City as Power provides broad comparative perspectives about the critical importance of urban landscapes as forums for creating maintaining and contesting identity and belonging Rather than serving as passive backdrops urban spaces and places are active mediums for defining categories of inclusion and exclusion With an international scope and ready appeal to visual learners the book offers a compelling survey of historical and contemporary efforts to enact state ideals express counter narratives and negotiate global trends in cities The contributors show how successive regimes reshape cityscapes to mirror their respective socio political agendas perspectives on history and assumptions of power Yet they must do so within the legal ethnic religious social economic and cultural geographies inherited from previous regimes Exploring the rich diversity of urban space place and national identity the book compares core elements of identity projects in a range of political cultural and socioeconomic settings By focusing on the built form and urban settings for social movements protest and even organized violence this timely book demonstrates that cities are not simply lived in but also lived through

Writing Windhoek Ellison Tjirera, 2025-10-01 Small cities have something to offer in terms of theoretical resources and renewing our understanding of urban life In other words all cities do matter and are therefore worthy of drawing from Condemning insignificant cities to oblivion is a travesty that will leave urban studies poorer Importantly no city is reducible to one register in the representation of its essence In Writing Windhoek Ellison Tjirera makes an attempt to revivify the Capital city of Namibia and treat it as an idea meriting a closer examination and reflection In illuminating the essence of Windhoek s cityness this book traces its history of spatial segregation an imprint that continues to define contemporary city life The cultural memory of Windhoek is analysed as a way of accessing what is otherwise a not so obvious strand through which to understand a city that has escaped a sustained scholarly rendition In his further layering of the city Tjirera provides a portrait of Windhoek through urban fantasies regimes of the legal and how migration is implicated in shaping social heterogeneity and concatenations of various urban rhythms

Diplomatic Para-citations Sam Okoth Opondo, 2022-02-09 Taking seriously the critical conception of diplomacy as the mediation of estrangement Diplomatic Para citations turns to the politics and laws that tie modern diplomacy to colonial cultures and the genres of Man that they privilege In an attempt to read the diplomatic from the African postcolony the book probes the injunction at the center of the law of genre that states that genres are not to be mixed This enables it to investigate the citational recitational forms of knowledge and practices of

recognition that reproduce the diplomatic and colonial order of things in the African context Through a reading of literature philosophy and a multiplicity of everyday practices in Africa and its diasporas Sam Okoth Opondo explores amateur diplomatic practices that provide a counterforce to laws that prescribe faithfulness to a norm form while proscribing the mixing of genres

COVID-19 Lockdowns and the Urban Poor in Harare, Zimbabwe Johannes Itai Bhanye, Fortune Mangara, Abraham R. Matamanda, Lameck Kachena, 2023-12-09 This book focuses on the socio economic impacts of the COVID 19 pandemic and associated lockdowns on the welfare of the urban poor in the city of Harare Zimbabwe The authors look through the lenses of the urban health penalty the right to the city complexity theory and distributive justice theory These four theories help situate the COVID 19 pandemic and its impacts on the urban poor in the theoretical foundations that raise issues of how the poor are affected by disease health pandemics due to their living conditions Uniquely the authors use remote ethnography tools such as rich texts video diaries and photo uploads to provide evidence based stories of how COVID 19 mobility restrictions have affected poor urbanites in Harare The book concludes that the COVID 19 pandemic mandatory lockdowns have deepened social and spatial inequality among the urban poor threatening their right to the city The socio economic impacts can upsurge poverty increase unemployment and the risks of hunger and food insecurity reinforce existing inequalities and break social harmony in the cities even past the COVID 19 pandemic period These socioeconomic impacts must be considered to make just cities for all from a right to the city perspective The authors recommend that mandatory COVID 19 lockdowns should not only be treated as a law and order operation but as a medical intervention to stem the spread of the virus backed by measures to safeguard the livelihoods of the urban poor while also protecting the economy This means governments should provide social safety nets to informal sector operators whose income generating activities are affected the most during the time of emergencies like COVID 19 Planners and policymakers should re envision pandemic resilient cities that are just equitable resilient and sustainable
