Published in the Economist in 1845, on the Principles of the Bank Act of 1844, and in 1847, on the Recent Monetary and Commercial Crisis (Classic Reprint) James Wilson, 2017-11-22 Excerpt from Capital Currency and Banking Being a Collection of a Series of Articles Published in the Economist in 1845 on the Principles of the Bank Act of 1844 and in 1847 on the Recent Monetary and Commercial Crisis We cannot but regard railways as a great branch of commerce standing in regard to our home trade and internal traffic in the same relation as shipping does to our foreign trade We must however most emphatically express the distinction which we make between Railways themselves and stock exchange speculation in Railway shares they are two things as far apart as things can be both in their tendencies and utility About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com

Macroeconomic Analysis in the Classical Tradition James C W Ahiakpor, 2021-03-22. Macroeconomic Analysis in the Classical Tradition explains how the influence of Keynes's macroeconomics including his changed definitions of some key macroeconomic concepts has impeded many analysts' ability to readily resolve disputes in modern macroeconomics. Expanding on his earlier work *Macroeconomics without the Errors of Keynes* 2019 the author delves into more aspects of macroeconomic theory and argues for a revision of Keynes's contribution to the field. Attention is given to theories and concepts such as Say's Law the quantity theory of money the liquidity trap the permanent income hypothesis 100% money and the Phillips curve analysis. The chapters work to build a careful critique of Keynes's economics and make the case that the classical macroeconomics of Smith Say Ricardo Mill and others could help resolve present day policy disagreements and redefine macroeconomic priorities. This book provides essential reading for advanced students and scholars with an interest in the foundations of Keynes's theories and current debates within macroeconomic policy.
