

The background of the book cover is an abstract composition of horizontal bands in various colors including yellow, orange, red, and purple. Overlaid on these bands are several geometric elements: two large teal circles, each surrounded by concentric thin lines, and a network of thin teal lines forming a grid-like pattern. A solid teal L-shaped graphic is positioned in the lower-left area.

Carbon-Neutral Architectural Design Pablo M. La Roche, 2024-05-31 The energy used to build and operate buildings is a significant source of greenhouse gas emissions While it is possible to reduce emissions through low carbon design many architects are not trained to do this Filling an urgent need for a design reference in this emerging field this book describes how to reduce building related greenhouse gas emissions through appropriate design techniques It presents strategies to achieve CO2 reductions with an emphasis on control of energy flows through the building envelope and passive cooling and heating strategies This new revised edition is updated throughout and includes a new section on embodied carbon and new chapters on daylighting and nature based cooling Features Adds new chapters on daylighting and nature based cooling with numerous updates throughout the rest of the chapters Presents strategies illustrated with examples for new construction and existing buildings to reduce energy consumption and reduce emissions Explains the origins of CO2 emissions associated with the operation and fabrication of buildings supplying water disposing of waste from the building and proposes strategies to reduce them Covers carbon calculations thermal comfort indigenous technology climate responsive design passive cooling and heating solar design air flow analysis daylighting building simulation and microclimate design with abundant examples Examines siting location to design buildings that adapt and mitigate their effect on climate change

Carbon-Neutral Architectural Design Pablo M. La Roche, 2016-04-19 The energy used to operate buildings is one of the most significant sources of greenhouse gas emissions To lessen the human impact on climate it is necessary to reduce these building related emissions New legislation as well as market and financial pressures are driving architects and developers to create low carbon buildings While it is possible to achieve many of these reductions through appropriate climate responsive design many architects are not trained to do this Filling an urgent need for a design reference in this emerging field Carbon Neutral Architectural Design describes how to reduce building related greenhouse gas emissions through appropriate design techniques This full color book presents strategies and methods to achieve CO2 reductions with an emphasis on control of energy flows through the building envelope and passive heating and cooling strategies Strategies for Designing Buildings with a Smaller Carbon Footprint Examining climate change and its relationship with buildings the book begins with a look at the sources of emissions and how these are produced as a result of interactions between buildings and the surrounding environment It then introduces a carbon neutral architectural design process CNDP and a roadmap that can be adjusted for different types of projects Discussing climate analysis and solar geometry the book explores how understanding the climate where a building is located helps to identify the design strategies that are best suited to that location whether warm and humid warm and dry temperate or cold It looks at psychrometrics and how to achieve thermal comfort with minimum emissions The book also explains how building fabric can be used to control energy flows by conduction radiation and convection helping to reduce overheating and overcooling and how to incorporate passive cooling and heating systems

through appropriate design The book includes useful references equations and illustrations as well as a comparison of free carbon counting tools that can be used for residential building design Drawing on the author s extensive experience in teaching and practice this is a valuable resource for anyone who wants to reduce the carbon footprint of buildings Find more study resources at the American Institute of Architects Carbon Neutral Design Project web site What s next for green building See what Dr La Roche has to say in this video on the HMC Architects blog
