Creativity 63 Short Exercises To A Happier Life:

If You're So Smart, Why Aren't You Happy? Raj Raghunathan, 2015-11-18 The first book by the creator of COURSERA's most popular online course in 2015 A Life of Happiness and Fulfillment Could the same traits that drive your career success also be keeping you from being happier Fifteen years after getting his MBA Raj Raghunathan spent some time with his old classmates He noticed that though they'd all done well there didn't appear to be much correlation between their academic success and career success What Raj found even more curious was the even smaller correlation between career success and what he calls life success The greater the career success the more unhappy out of shape harried and distracted his friends were If intelligence helps with decision making smart people should naturally make better life choices So why are so many of the smartest brightest most successful people profoundly unhappy Raj set out to find an answer to this problem and extensively researched happiness not just of students and business people but also stay at home parents lawyers and artists among others If You're So Smart Why Aren't You Happy takes readers on a fun and meaningful tour of the best research available on how some of the very determinants of success may also come to deflate happiness Raghunathan explores the seven most common inclinations that successful people need to overcome and the seven habits they should adopt instead Among his surprising findings The correlation between wealth and happiness is much smaller than you'd expect it to be Generosity is not only a key to happiness but a determining factor of long term success Appreciating uncertainty rather than seeking full control of outcomes is necessary for happiness If You're So Smart Why Aren't You Happy will give you a powerful new perspective on your work personal goals and relationships whether you're already successful or just starting out [A Brief History of Creative Work and Plutonomy](#) Mathew Varghese, 2020-11-10 This book discusses the influence of creative work on human life and the role it has played in shaping human civilization since antiquity To do so it analyzes the history of thought on creative work from three civilizations Greek Indian and Chinese as well as contemporary neurological studies on consciousness According to the classical Greeks humans are instinctively predisposed to use creative work to gain truth wisdom and happiness the Indians consider that Dharma duty morality etc can be achieved only through work karma and for the Chinese creative work is needed to attain the supreme wisdom Dao Modern studies on consciousness show that our brain creates a personal self model ego tunnel when we learn things creatively and developing such skills provides lifelong protection for the brain In the 21st century human involvement in creative work is declining as we use mechanized systems to gain more and more profit but the wealth falls into the hands of the few super-rich the Plutonomy As creative work is taken over by AI systems human work is reduced to operating those machines and this in turn leads to an exponential growth in the number of part-time workers Precariat The declining value of human life today is a consequence of this change in society Further reducing creative work means we have no way to distribute wealth nor do we have any means to address problems like the lack of enthusiasm in the young the health crisis due to lack of physical activity or the environmental crisis due to the
